SEED PREPARATORY EQUIPMENTS, OIL FILTERS, OIL REFINING PLANTS AND ALLIED EQUIPMENTS.

UMAS

WOLF MK1 OIL EXPELLER

All Steel Fabrication and Improved Design

For perfect alignment and stability.

Vertical Hinged 24" Pressing Box

Entirely eliminates the difficult task of removing box for relining or for replacement of worms, which saves time and labour.

Shaft Withdrawal

The main Worm Shaft can be withdrawn very easily without disturbing the gear section in any way and pressure worms and spacing collars can be changed without disturbing the shaft. The thrust of the pressure worm is taken upon a large thrust bearing.

Pressure Cone

The final pressure of the cake is positively controlled by a Pressure cone.

Power

Power required to drive the "UMAS" WOLF MK1 Oil Expeller is 10HP and for Cooker 1 HP.

Gear Box & Lubrication

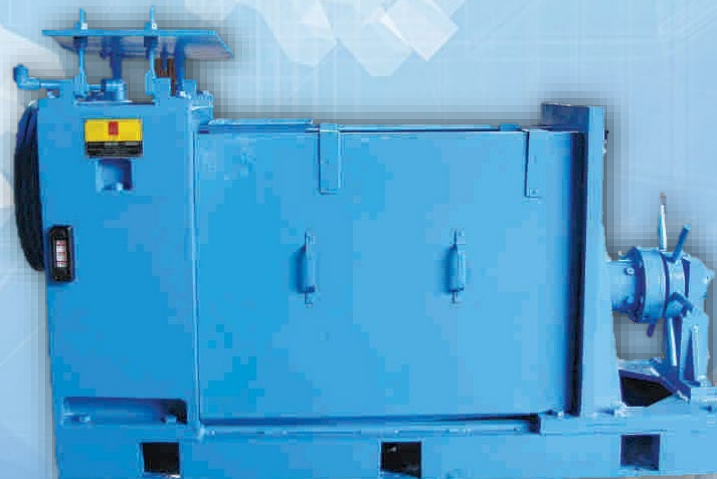

A double reduction gear unit made from most suitable special steel runs in oil bath. All shafts run on antifriction bearings. The drive housing is oil tight, dust proof and totally enclosed.

Capacity

The capacity, however, varies with material and working conditions. The average capacity is 1 to 1.5 tons.

Also suitable for cold pressing

A Feeding Kettle / hopper can be provided instead of the steam kettle for Cold pressing.
