

How will my property be secured?

At **BVD Property Management**, we make use of the latest technology to ensure that your property is secure at all times and, at the same time, is accessible to you! When you choose us to manage your vacation rental property, we will install, **at our expense**, a keyless entry door lock with digital touchpad that is WiFi enabled.

This commercial grade door lock provides us, as the property manager, and you, as the owner, complete control of access to your property as well as a robust list of features...

- You can enter your property at any time that it is not rented without having to obtain a key card
- We can assign a numeric code to guests that is valid only during the duration of their stay
- The WiFi feature allows us to control the lock from virtually anywhere
- We can receive real time alerts to be notified when guests arrive
- A log is maintained of who entered the property and when
- A hard key is provided as back-up for use in case of a technology failure

Please feel free to contact us if you would like more information about our door management program and how it will improve your owner experience.
