Performance		XR
Certified Payload		763 Kg
Certified Range		198 Km*
RealRange™		150 + 10 Km*
Maximum Speed		45 Km / hr [RANGE MODE] 55 Km / hr [THUNDER MODE]
Charging Time*		AC charging: 5 - 5.5 hours
On-board Charger		Plug and play charging gun. No additional steps or components.
On-board Charger [Power]®		3.3 kW
Battery Powerpack		
Battery Type / Location		Lithium-ion battery / Chassis integration
Energy		13.44 kWh
Specifications		
Type		L5N
Seating Capacity		D + Cargo
Turning Radius		3.5 m
Cabin Type		Reinforced Sheet Metal
Ground Clearance		300 mm [Unladen] 240 mm [Laden]
Track Width		1270 mm
Wheelbase		2200 mm
Gradeability		21% / 11.8 degrees [RANGE MODE] 30%/16.7 degrees [THUNDER MODE]
Variant		
Overall L x W x H		3400 mm x 1460 mm x 2100 mm
Gross Vehicle Weight		1495 Kg
Motor		
Power [peak]		11.7 kW
Torque [peak]		88.55 Nm
Brake systems		
Front		Disc Brake
Rear		Drum Brake
Suspension systems		
Front		Hydraulic shock absorber with helical spring
Regenerative Braking		Yes
Water and Dust Proof Battery (IP67)		Yes
Water Wading Height		1 Foot
Head Lights		Integrated Projector Headlamps
Vehicle warranty		5 years / 1.25 Lakh Km [§]

Industry best
13.44 KWh battery

Battery warranty-
7 years / 1.5 Lakh Km^

Lithium
ion battery

Real Range™: Real Range means the distance your electric vehicle can travel on a full charge under normal conditions. This distance is an estimate based on actual usage conditions.*Certified range is always higher than Real Range™ because it is tested under controlled laboratory conditions (IDC method) with light load and controlled driving.

**Normal conditions include factors such as vehicle speed and braking rate, battery health, road and traffic conditions, weather, or temperature. All these affect the vehicle's range.

#Charging time depends on output voltage.

^Warranty is up to 7 years / 1.5 Lakh Km, which includes an additional 2 years / 25,000 Km extended warranty

§ Conditions apply

^As compared with ICE vehicles
