Project Development & Outreach

The CSR Direct Project

The CSR Direct Project is this concept for a nonprofit organization that is already serving our community regarding much needed comprehensive resource listings.

The CSR Direct Project is all about facilitating community participation while creating resource listings that are actually complete and up to date. Where, we are genuinely working together, as a community, to create actual trustworthy resource information.

We are here to serve our whole community. But, with priority given to people most in need. Our resource listings are focused subjects, provided in multiple formats, online and off!

As the developer, I began this work because I was considered “homeless.” The seeds of this concept came during my experience in the shelter system. I continue to be committed to this work because no one else in the helping community has proven capable or even interested in leading this kind of work. The narrative defining our social services is being challenged, corrected, and confronted.

This Project development is meant to be a work in progress. It is here to support & facilitate Community Service and Social Justice!

I ask for your support and participation. Thank you for your time!
David Jordahl, developer, administrator
