

SPECIFICATIONS

IntelliSiren® Alarm

- Dimensions: 12" tall x 12" wide x 5" deep; a 10" antenna adds to the height
- Speaker: 120dB, allowing it to be heard 500 feet away
- NO Voice Files, only siren and lights
- Must connect to WeatherCall servers via cellular signal
- Has an accompanying web-app allowing for customization of alarm sound, duration, repetition, and tests
- The app also displays radar, lightning, and current NWS weather alerts
- Requires AC power (solar optional for additional fee), battery-powered backup for up to 4 hours
- COST: One time device purchase with annual monitoring/activation fee

IntelliSiren® Park

- Dimensions: 20” tall x 12” wide x 8” deep; a 10-inch antenna adds to the height
- Speaker: 130dB, allowing the siren to be heard 2,400 feet away; audio messages 1,200, depending on atmospheric conditions
- Can support up to 4 speakers for 360-degree coverage
- Can connect to WeatherCall servers via cellular signal
- Has an accompanying web-app allowing for customization of alarm sound, duration, repetition, and tests
- The app also displays radar, lightning, and current NWS weather alerts
- 10 pre-recorded audio files are available, 8 are weather safety/all-clear messages
- 10 additional user-customizable audio files are included to be activated via web app
- Siren sound can precede an audio message (user-selectable)
- Requires AC power (solar optional for additional fee), battery-powered backup for up to 4 hours
- WeatherCall can provide a QR code to extend phone calls and texts to area visitors/guest with the addition of a WeatherCall Community account
- COST: One time device purchase with annual monitoring/activation fee

IntelliSiren® Community

- Solar power is standard; Control box and Motor Contactor can also be AC powered 110V or 220V
- Can be activated via cellular signal or 900 MHz repeater system
- Can connect to WeatherCall servers via cellular signal
- Many options are available. Reach out to your local sales rep for additional information
- COST: One time device purchase with annual monitoring/activation fee

PLUS MORE!

IntelliSiren® Alarm

- All in one control unit
- High-pitched speaker (120dB)
- 2 flashing lights, one for lightning detection within 6 miles, and the other for a Tornado Warning
- Siren sounds every 10 minutes (user-defined) as the lights flash until 30 minutes after the last lightning strike within 6 miles, or the expiration of the Tornado Warning
- Can be heard up to 500 feet away
- Must connect to WeatherCall servers, which happens via cellular signal
- Can also be manually activated through web-app/desktop dashboards.
- Perfect for pools, playgrounds, and small spaces where people gather

IntelliSiren® Park

- This unit has a controller
- Flashing lights
- Up to 4 speakers that sound a siren, followed by voice files for the alert type.
- WeatherCall Services can provide automated alerting for chosen National Weather Service issued warnings, followed by warning expiration, with up to 10 customizable messages.
- Can also be manually activated through web-app/desktop dashboards
- Estimated range for voice files: 1,250 feet, depending on atmospheric conditions.
- Perfect for RV parks, campgrounds, large parking lots, recreation areas, sports complexes, and other areas where larger groups of people gather.

IntelliSiren® Community

- Similar to the Park model
- Has up to 12 speakers
- NWS warnings and all clear messages can be fully automated by WeatherCall Services
- Up to 10 custom messages are included.
- The estimated range for the siren sound is 4,800 feet, with a voice range of up to 2,400 feet, depending on atmospheric conditions.
- Can also be manually activated through web-app/desktop dashboards.
- Perfect for large neighborhoods, towns, and cities when looking to either add coverage or replace outdated outdoor warning sirens.

Saving Lives, Caring for People

All Models Come With:

- All can be solar powered (extra fees may apply).
- Battery backup available in case of AC power loss (extra fee may apply).
- Cell-based communication to WeatherCall for automated activation. (IntelliSiren® can be activated by 900 MHz radio, please talk to your local sales rep for details.)
