

MARCHING BAND HEAT SAFETY.

NOW REQUIRED. NOW AUTOMATIC.

Real-time Wet Bulb Globe Temperature (WBGT) forecasts and automated alerts for every rehearsal field and contest site — no on-site instrument to buy, calibrate, or track down mid-rehearsal.

HOW IT WORKS

WE MONITOR

Hourly WBGT values for every rehearsal field and site — 24/7.

WE FORECAST

Twice-daily outlooks up to 10 hours in advance.

WE ALERT

Automatic notifications the moment Class 2 or Class 3 thresholds are expected or reached.

WHY WBGT?

The UIL-required metric for outdoor marching band activities. It measures real heat stress by combining four factors:

- Temperature
- Humidity
- Sun Exposure
- Wind

WBGT HOURLY FORECAST - YOUR PRACTICE FIELD

08	09	10	11	12	13	14	15	16
75	77	81	83	86	88	87	86	85

WBGT ALERT - YOUR PRACTICE FIELD

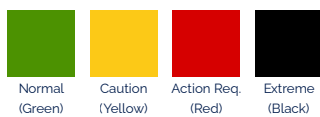

ACTION REQUIRED - 88

Class 2 threshold exceeded. Shorten work/rest cycles and confirm rapid cooling zone is staged.

ACTIONABLE INTELLIGENCE, BUILT FOR REHEARSAL DAYS

Every alert gives your staff the information and guidance needed to make fast, confident calls on the field.

- ✓ Current WBGT value
- ✓ Class 2 / Class 3 risk level
- ✓ Recommended work rest ratio and hydration guidance

BUILT FOR TEXAS BAND PROGRAMS

- 🎵 Marching Band
- 👥 Booster Programs
- 🏃 Athletics
- 📋 EAP Compliance
- 🏃 Cross Country

MORE THAN HEAT WEATHERCALL ALSO MONITORS:

STAY COMPLIANT. KEEP STUDENTS SAFE.

The 2026–2027 heat mandate takes effect on

AUGUST 1, 2026
