# OPHEIM SEED & CHEMICAL NEWSLETTER

May 2017

## Casey Has Arrived

Opheim Seed & Chemical's newest Sales Agronomist, Casey Huxford, has officially joined the team! I know Casey has met several customers already, but if you haven't had the chance to meet him stop by the office or contact him by email or phone. Casey's cell is 515-867-3687 and his email is [casey@opheimseedandchemical.com](mailto:casey@opheimseedandchemical.com). Casey would be happy to be an added resource to your operation by scouting fields and answering any agronomy related questions you have during this growing season.

## Holden Miller: A+

We want to give well deserved recognition to our Warehouse Foreman, Holden Miller, for his perfect score with our seed inventory this year. Holden is the first person to achieve 100% accuracy with our seed inventory since OS&C opened its doors in 1997. Jason said, "I didn't even have 100% accuracy when I only sold a couple hundred bags of seed." We have a lot of different seed brands, hybrids, seed size, treatments, and numbering systems that make their way through our warehouse, however, Holden managed the logistics very well. So congratulations to Holden for setting a record. Jason and our customers appreciate your dedication!

## Seed Returns

We are ready to begin receiving seed returns if you have any unused corn or untreated soybeans, as well as, any pro boxes and seed pallets that you have at your farms from OS&C. Bring these items to the warehouse and there will be someone here to help you unload and get you a return ticket. If you have any questions please call Jason or Holden.

## Crazy Weather

Severe weather has reared its ugly head a couple of times already this spring resulting in damage to local houses, buildings, vehicles, and possibly some of the corn crop. Below are pictures from a farm field on Hwy 3 near Goldfield where the hail stones left quite an impression in the ground, hail stones from OS&C office, hail damage to the building site at OS&C, and one of the vehicles at OS&C. Looks like the construction continues here at the office, as all buildings will be getting new steel put on them in the coming months. If you need any replant seed due to hail or water, please let Jason know, he will be happy to help you. If you were unable to get your bean pre on we have some chemical options that will allow you to spray post emergence and still allow for a Flexstar pass to be made.

## Winter Getaway: Cozumel

FYI: Be looking in your mailbox for your 2018 Winter Getaway packet from Summit Planners to Cozumel. We have had a great response to the trip so far and would love to have more join the trip. Call Jason to get your name on the list.

### OPHEIM SEED & CHEMICAL WINTER GETAWAY 2018

Participants who confirm attendance in the next 2 weeks will be entered into a drawing for a free upgrade!
