

XO 1632E

Comments for Optimum Performance:

Proven performance across many years and environments. Solid agronomics including IDC, SDS, BSR, and 3a PRR gene. Seeding rates– 120 to 150K

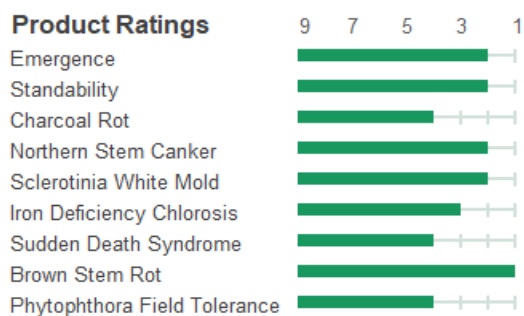

XO 1837E NEW

Comments for Optimum Performance:

Strong emergence and quick canopy. Heavy branching loaded with pods. Prefers higher VPI environments. Great option for reduced seeding rates– 120 to 150K

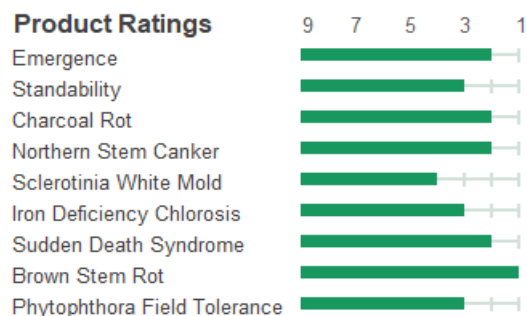

XO 1776E

Comments for Optimum Performance:

Excellent option for high management. Excellent disease package with upright canopy and SWM protection. Medium stature and better in higher yield environments. Seeding rate 130 to 160K

XO 1986E

Comments for Optimum Performance:

Top notch IDC tolerance with average SWM tolerance. Medium plant type consistent across yield environments. Conservative option on drought stress acres. Seeding rate– 140 to 170K

Opheim Seed & Chemical's Seed Recommendations for 2027

Notes

XITAVO™ SOYBEAN SEED EXCLUSIVELY DISTRIBUTED BY BASF CORPORATION. Always read and follow label directions. XO 2075E

Comments for Optimum Performance:

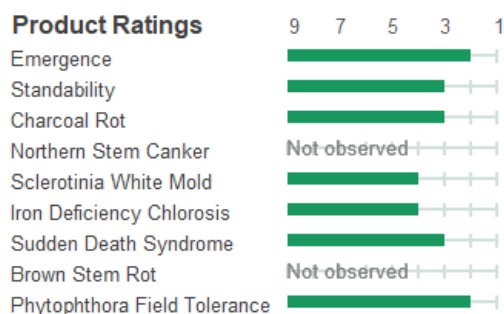

Broad acre and stable performance across wide geography. Good SWM tolerance with Peking SCN source. Med-Tall plant type excellent standability. Seeding rate – 140 to 180K

XO 2087E NEW

Comments for Optimum Performance: Performs across wide geography. Well suited to Des Moines lobe. Dependable in both heavy and light soil environments. Strong defensive characteristics. Seeding rate– 130 to 160K

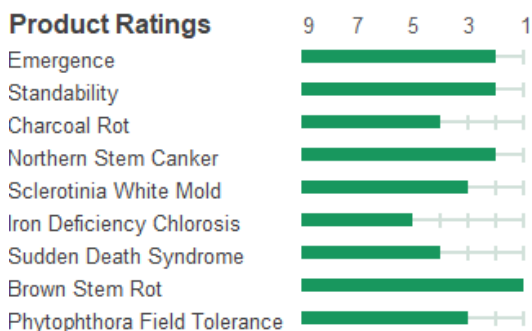

XO 2127E NEW

Comments for Optimum Performance:

Offensive variety for top end production. Target high yield environments. Built on pedigree of 1632 . Improved SWM and PRR resistance. Seeding rate – 120 to 150K

XO 2366E

Comments for Optimum Performance:

Step change in yield you've been waiting for in this RM! Medium plant type with solid SWM, PRR, and SDS tolerance. Caution on IDC – Seeding rate 130 to 160K

XO 2556E

Comments for Optimum Performance:

Top Performer in fertile prairie soils. Versatility for broad acre. Peking source of SCN. Good SDS and SWM tolerance. Seeding rate – 130 to 160K

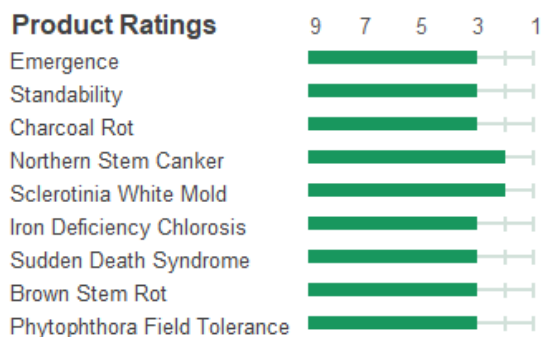

XO 2777E NEW

Comments for Optimum Performance:

Excellent early season vigor. Great standability in the late season. Full uniform canopy. Great early season disease tolerances in saturated soils. Seeding rate – 120 to 160K

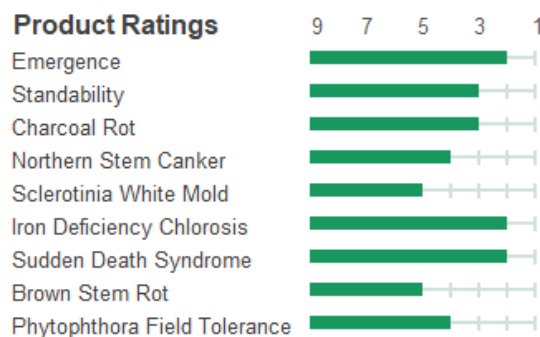

XO 2832E

Comments for Optimum Performance:

High-yielding product stacked with excellent standability. Strength in narrow rows. Recommended for average to higher planting populations. Seeding rate – 130 to 170K

XO 3014E

Comments for Optimum Performance:

Dominant performance in the early group 3 stacked with STS. Excellent versatility on many soil types across yield environments. Seeding rate – 110 to 140K
