AgriGold 2027 Corn Hybrids

98 - 101 day maturity

BRAND
A628-11
NEW
98 DAYS

GENETIC FAMILY	GXJ GXF
TRAITS	VT2RIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	30-32,000	32-34,000	34-36,000
NARROW	33-35,000	35-37,000	37-39,000

MANAGING FOR OPTIMAL PERFORMANCE

- Taller-statured plant with strong agronomics and proven performance
- Strong foliar disease tolerance and good tolerance to ear rots
- Best performance when planted at higher populations

BRAND
A630-04
100 DAYS

GENETIC FAMILY	GXJ
TRAITS	AA, D, CONV
SPECIALTY USAGE	SILAGE SELECT

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	30-32,000	32-34,000	34-36,000
NARROW	32-34,000	34-36,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Performs best in moderate to high-yield environments
- Ear flex by ear length supports moderate to low planting populations
- Responds favorably to fungicide and sidedress-nitrogen applications

BRAND
A631-08
101 DAYS

GENETIC FAMILY	GXJ
TRAITS	DV, VT2RIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	30-32,000	32-34,000	34-36,000
NARROW	32-34,000	34-36,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Broadly adapted product excels across various environments
- Strong agronomics enable broad east to west movement
- Benefits from a fungicide application to protect leaf tissue

102 - 106 day maturity

BRAND
A632-13
NEW
102 DAYS

GENETIC FAMILY	GXH GXA
TRAITS	SSPRIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	26-32,000	32-34,000	34-36,000
NARROW	29-32,000	32-36,000	36-39,000

MANAGING FOR OPTIMAL PERFORMANCE

- Has excellent agronomics and trait protection for heavily pressured CRW acres
- Very good stalks and roots
- Recommend using a fungicide in heavy tar spot pressure environments

BRAND
A634-11
104 DAYS

GENETIC FAMILY	GXH
TRAITS	SSPRIB
SPECIALTY USAGE	SILAGE SELECT, HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-31,000	31-34,000	34-36,000
NARROW	30-33,000	33-35,000	35-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Fits exceptionally well on highly productive soils under heavy CRW pressure
- Maximize yield performance with a fungicide application
- Excellent option for areas with a history of Goss's wilt

BRAND
A636-11
106 DAYS

GENETIC FAMILY	GXF
TRAITS	VT2RIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-34,000
NARROW	30-32,000	32-34,000	34-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Plant at medium to higher plant populations for optimal performance
- Provides strong yield stability under variable conditions
- Delivers strong emergence and vigor to allow for planting in cool conditions

106 day maturity

BRAND
A636-16
106 DAYS

GENETIC FAMILY	GXB
TRAITS	DV
SPECIALTY USAGE	SILAGE SELECT

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-34,000
NARROW	30-32,000	32-34,000	34-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Great option for areas affected by high tar spot pressure
- Plant early to take advantage of strong emergence and vigor
- Has shown solid performance across a range of cropping and tillage systems

BRAND
A636-22
NEW
106 DAYS

GENETIC FAMILY	GXB GXA
TRAITS	TRCRIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	26-30,000	30-32,000	32-34,000
NARROW	30-32,000	32-34,000	34-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Delivers exciting yield performance with broad acre placement versatility
- Has shown excellent foliar disease tolerance, including southern rust
- Recommend using a fungicide in heavy tar spot pressure environments

BRAND
A636-42
106 DAYS

GENETIC FAMILY	GXF
TRAITS	SSPRIB
SPECIALTY USAGE	

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-34,000
NARROW	30-32,000	32-34,000	34-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Maintains excellent late-season intactness and harvest appearance
- Built for continuous corn acres with rugged agronomics
- Provides excellent protection against heavy CRW pressure

AgriGold 2027 Corn Hybrids

107-109 day maturity

BRAND
A637-72
107 DAYS

GENETIC FAMILY	GXG
TRAITS	VT2RIB
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-35,000
NARROW	28-30,000	30-33,000	33-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Performs well on rugged acres, delivering exceptional grain quality and test weight
- Provides excellent drought tolerance and performance in wet feet environments
- Thrives under lower populations

BRAND
A638-91
108 DAYS

GENETIC FAMILY	GXF
TRAITS	VT2RIB, CONV
SPECIALTY USAGE	SILAGE SELECT, HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	26-31,000	31-33,000	33-36,000
NARROW	31-34,000	33-36,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Features exciting genetics with strong yield performance and broad adaptation
- Offers excellent ear flex
- Apply fungicide at VT/R1 to protect against heavy disease pressure

BRAND
A639-38
109 DAYS

GENETIC FAMILY	GXG
TRAITS	V
SPECIALTY USAGE	SILAGE SELECT, HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	26-30,000	30-33,000	33-36,000
NARROW	29-33,000	33-35,000	35-37,000

MANAGING FOR OPTIMAL PERFORMANCE

- Combines strong yield potential with excellent agronomics, making it a versatile product
- Place with confidence in challenging yield environments
- Moves well south of its maturity zone, making it an excellent choice for early dry down

110-111 day maturity

BRAND
A640-24
NEW
110 DAYS

GENETIC FAMILY	GXF
TRAITS	VT2RIB, CONV
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-32,000	32-34,000	34-36,000
NARROW	30-34,000	34-36,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Broadly adapted to move across a variety of soil types
- Excellent performance north and south of maturity zone
- Heavy NCLB pressure will require fungicide treatment

BRAND
A640-94
110 DAYS

GENETIC FAMILY	GXF
TRAITS	VT4RIB
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	27-30,000	30-33,000	33-36,000
NARROW	30-33,000	33-36,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Delivers excellent yield stability across multiple maturity zones and yield levels
- Has demonstrated solid performance in challenging and drought-stressed environments
- Use additional control measures when placed in areas with heavy rootworm pressure

BRAND
A641-33
NEW
111 DAYS

GENETIC FAMILY	GXF GXG
TRAITS	SSPRIB
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	34-36,000
NARROW	30-32,000	32-34,000	36-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Built to handle heavy CRW pressure on productive soils in the Corn Belt
- Strong greensnap and Goss's wilt tolerance for western Corn Belt zones
- Has showcased very good southern rust tolerance

112-114 day maturity

BRAND
A642-18
112 DAYS

GENETIC FAMILY	GXF
TRAITS	SSPRIB, STXPRO, TRCRIB, TRC
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-34,000
NARROW	30-32,000	32-34,000	34-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Shows broad adaptability with excellent movement south of the normal maturity zone
- Responds favorably to early-season starter or sidedressed nutrients
- Thrives under an aggressive, highly-managed environment

BRAND
A642-32
112 DAYS

GENETIC FAMILY	GXF
TRAITS	VT2RIB, CONV
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-33,000	33-36,000
NARROW	30-32,000	32-35,000	35-38,000

MANAGING FOR OPTIMAL PERFORMANCE

- Features a semi-flex ear that can adapt to multiple population zones and yield levels
- Delivers consistent results in high-yield environments
- Apply late-season nitrogen and fungicide to maximize yield

BRAND
A644-64
114 DAYS

GENETIC FAMILY	GXH
TRAITS	VT2RIB, VT2PRO
SPECIALTY USAGE	HEC

PLANTING POPULATION

ROW TYPE	LOW	MEDIUM	HIGH
30"	28-30,000	30-32,000	32-35,000
NARROW	28-30,000	30-33,000	33-36,000

MANAGING FOR OPTIMAL PERFORMANCE

- Responds well to high-yield environments and aggressive management practices
- Provides excellent ear flex, to help achieve high-yield levels across varying populations
- Thrives with fungicide and split-nitrogen applications
