

Personalized Product Recommendations

Above Ground Protection

KR-4802D 100 Day

K-0802 Conv

Top all around early hybrid
Great drought tolerance and ear flex
Solid ear retention, roots and stalks
Harvest Intactness and Green snap tolerance
Loves wet or dry soils

KR-4704D 104 Day

K-0704 Conv

Top yields in Corn on Corn
Great ear flex for lower populations
Adapted well north to south in Iowa
Good standability and drydown
Plant anywhere

KR-4706 106 Day

K-0706 Conv

Top end yield potential
Early Emergence and vigor for cold wet soil
Diverse package for early or late adaption
Solid standability and low risk to greensnap
Plant on Better Soils

K0518DD 105 Day

Drought Gard hybrid with Ear Flex
Consistent yields across soil types
Solid roots and stalks for easy harvest
Good Drydown and grain quality

K0915DD 109 Day

Great companion to K1005DP for performance
Great ear flex for lower populations
Good standability and drydown
Plant on better Soils responds to high Management

K1005DP 1110 Day

K1005CV

The Standard for Top Yields Across Iowa
Early Emergence and vigor for cold wet soil
Diverse package for early or late adaption
Quick dry down for early harvest

Above Ground Protection

K4R-9802 102 Day

Top all around early hybrid
Great drought tolerance and ear flex
Solid roots and stalks
Harvest Intactness and Green snap tolerance

K4R-9704 104 Day

Top yields in Corn on Corn
Great ear flex for lower populations
Adapted well north to south in Iowa
Good standability and drydown

K4R-9706 106 Day

Top end yield potential
Early Emergence and vigor for cold wet soil
Diverse package for early or late adaption
Solid standability and low risk to greensnap

Below Ground Traits

K0358SS NEW 103 Day

K0358DP NEW

Companion to KR-4802D and KR-4704D
Consistent yields in all conditions, wet or dry
Excellent emergence and early vigor in cold soil
Great disease package for C/C and No-Till

K0915SS NEW 109 Day

Top yield potential in Great standing hybrid
Great Disease scores for corn on corn
Excellent ear flex & Solid drought tolerance
Well adapted to north central Iowa

K1005SS NEW 110 Day

Tremendous Yield Potential
Best Performance on Well-drained, High yield acres
Excellent emergence and early vigor in cold soil
Quick drydown will aid in early harvest
