

Foot care and nail cutting service

We are proud to offer to you a basic foot care and nail cutting service in the comfort of your home. This service is particularly helpful for those people who may not be able to reach their feet or are at risk of falls in reaching their feet. Our Registered Nurse completed qualifications in foot care and can delivered non-complex care..

These services can be costed against the home care package or NDIS. This service offers a relaxing and calming experience -We use high quality foot soaks and moisturising products to provide an enjoyable experience.

To ensure safety and infection prevention and control procedures, we conduct full sterilisation of equipment using an 'icanclave', Class B steriliser which is TGA approved and compliant with the Australian Standards. This steriliser has inbuilt safety and quality features such as the ability to identify any issues and provide the error code for rectification, and a system to remind of maintenance. We conduct regular helix tests to ensure the equipment is working and sterilising correctly.
