

freestanding power/data beam

LINE

power+data=ILINE

**ILINE creates a total open plan solution,
seamlessly integrating with our
ACTIV height adjustable bases**

Our ILINE power/data beam offers the ability to manage power and data individually, to unlock from the grid and position each workstation as needed.

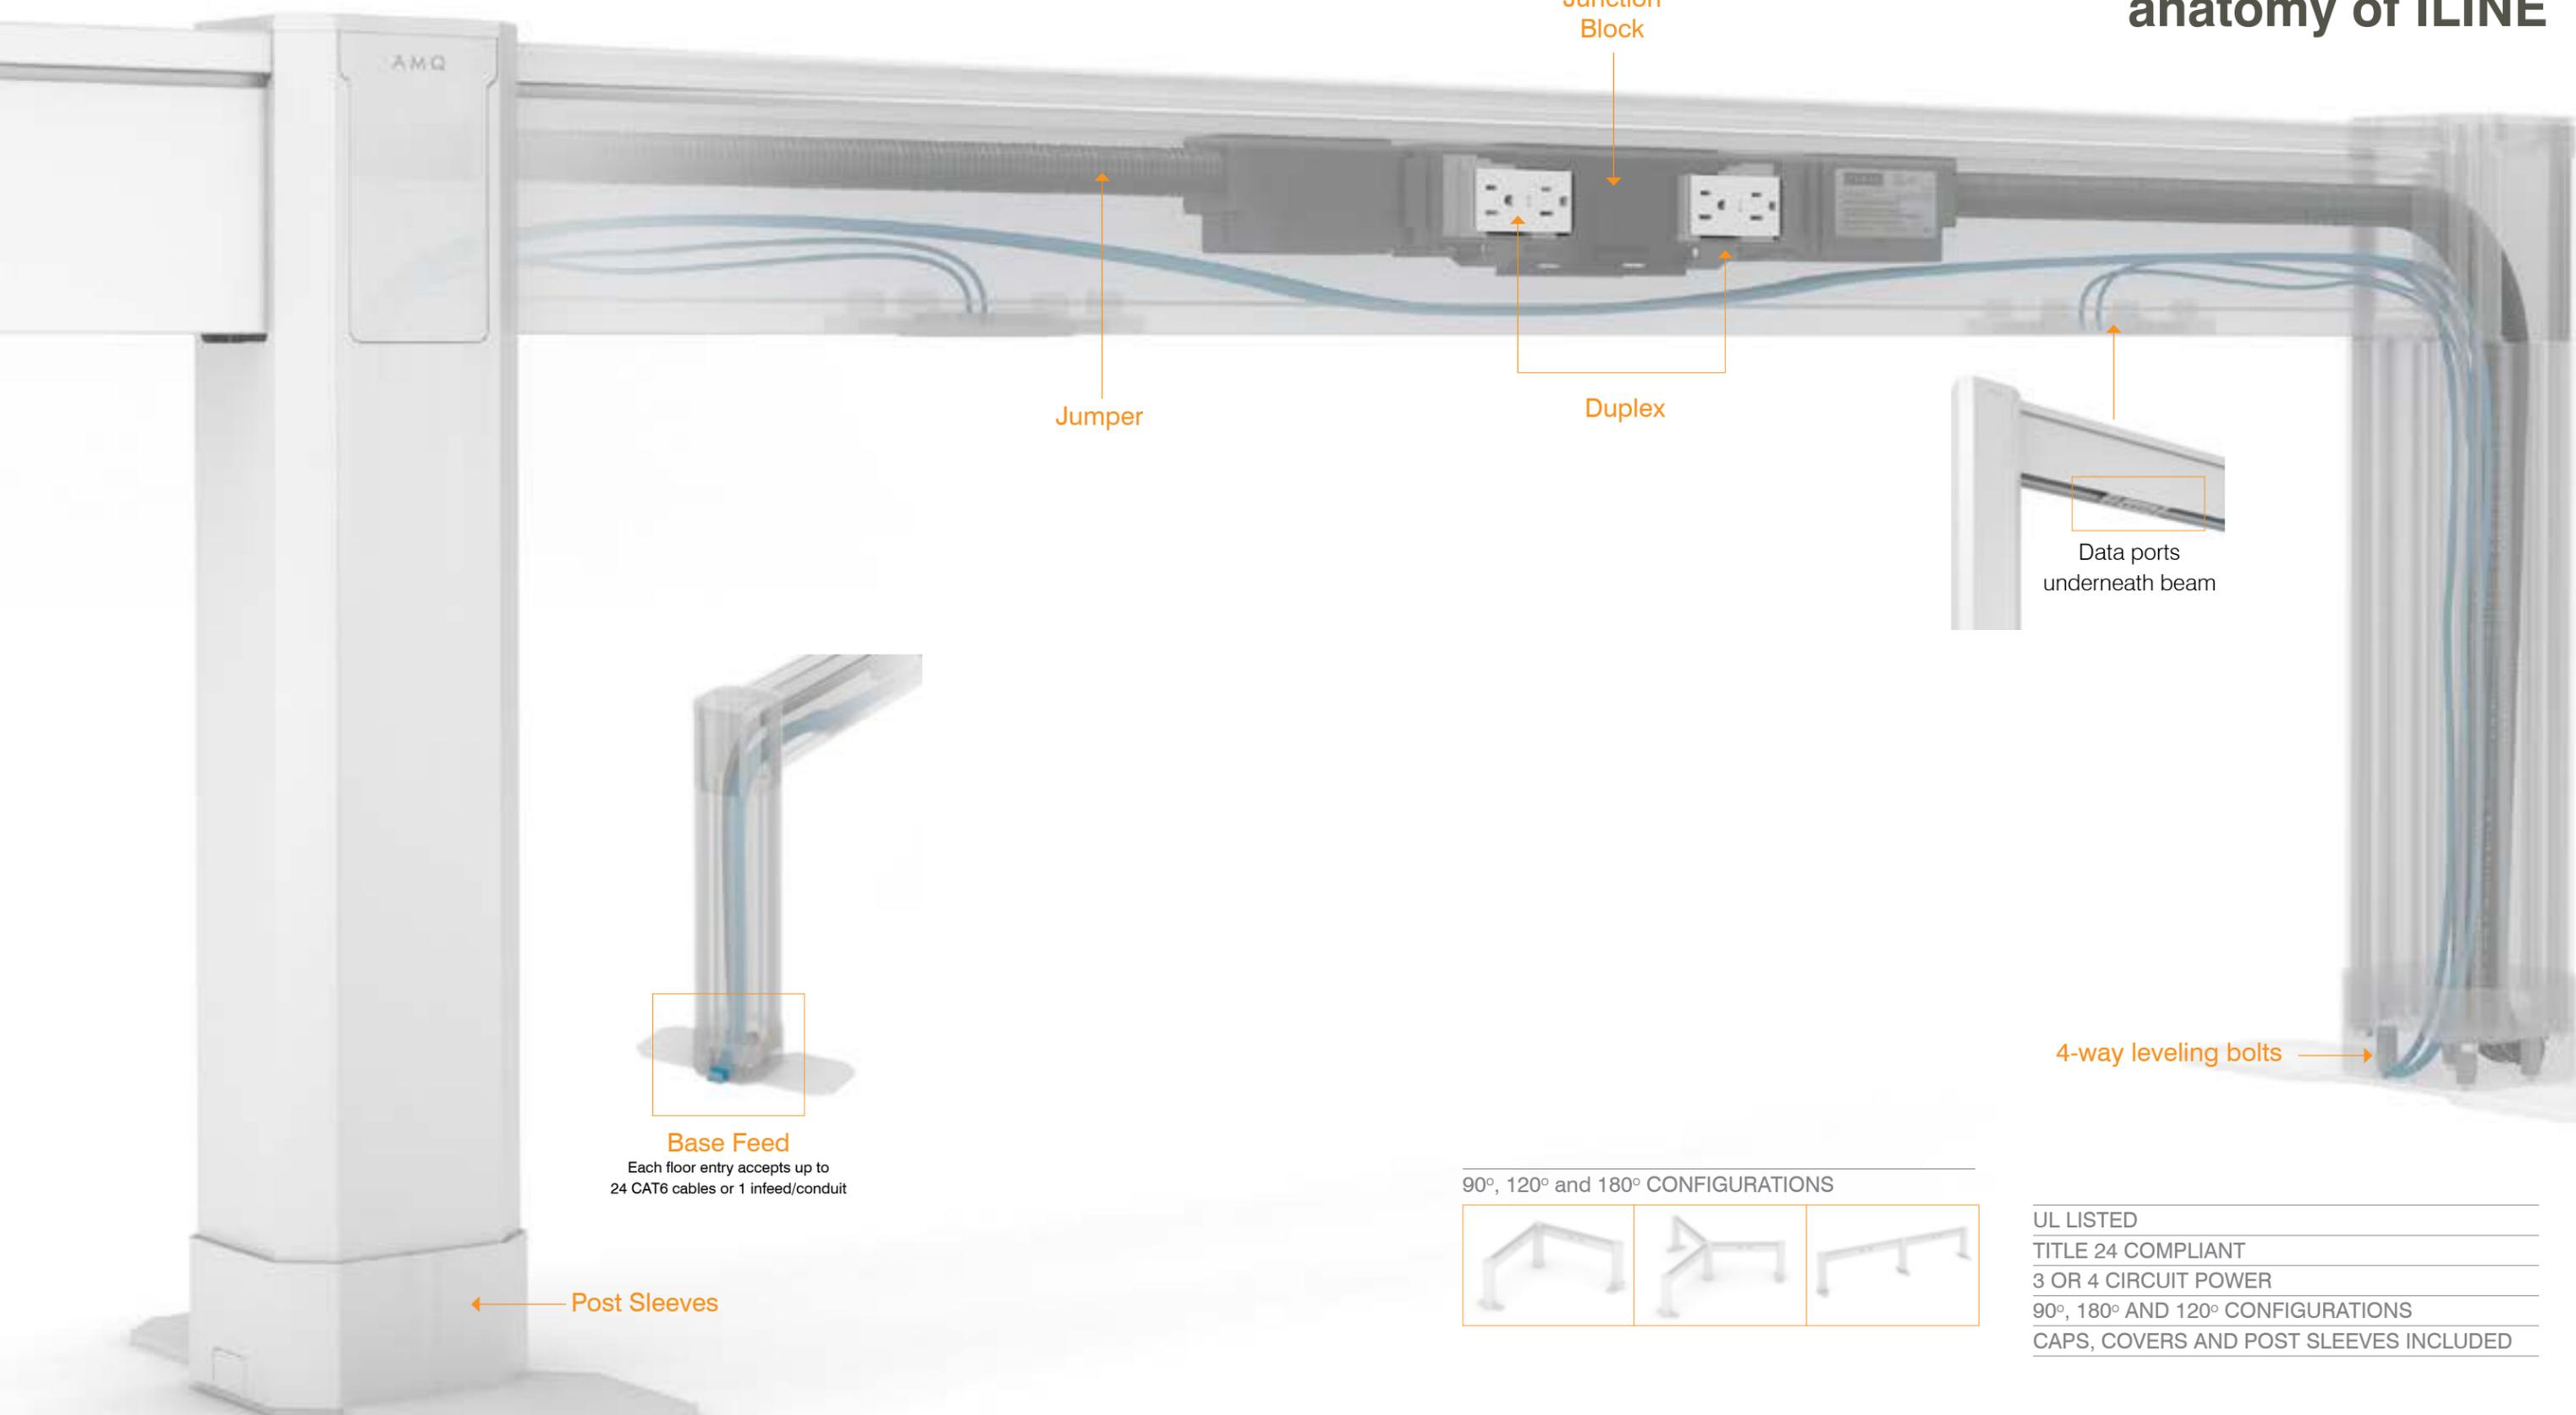

**ILINE delivers a finished look,
with face plates and post
sleeves included**

ILINE beams connect in a linear, 90° or 120° configuration, with all cables neatly tucked away.

90° and 120° applications add flexible space planning options

ILINE has built in up-mounted privacy screen channels, allowing screens to clip right into the beam.

anatomy of ILINE

Jumper

Junction Block

Duplex

Data ports underneath beam
