The Honorable

United States Senate

Washington, DC 20510

**Subject:** Oppose the “One Big Beautiful Bill Act” – A Clear Threat to Americans’ Well-Being

Dear Senator

As a concerned citizen and constituent, I am writing to urge you to vote **against** the so-called *One Big Beautiful Bill Act (OBBBA)* currently under Senate consideration. While its name suggests benefit, the reality is that this bill poses a serious threat to the health, financial stability, and civil rights of millions of Americans.

We elected you to represent **all of your constituents**, not just those with wealth, influence, or corporate interests. Your sworn oath to uphold the Constitution means your duty is to safeguard the rights, liberties, and welfare of the American people. Voting in favor of legislation that does the opposite is a direct betrayal of that oath.

**Here are just a few of the most alarming elements of this bill:**

- **Cuts to Medicaid and SNAP:** Millions of families rely on these programs to access basic healthcare and nutrition. The proposed work requirements and administrative barriers will disqualify many of the most vulnerable in our society—children, seniors, and disabled individuals. This is not fiscal responsibility; it's cruelty.
- **Rollback of Clean Energy Incentives:** By gutting critical components of the Inflation Reduction Act, the bill jeopardizes our nation's path toward a sustainable future, risking both our environment and the clean energy jobs that support thousands of working families.
- **Extending the 2017 Tax Cuts:** These cuts primarily benefited the wealthiest Americans and corporations. Extending them further bloats the national debt while doing little to support everyday citizens. Instead, we need tax reform that benefits the working and middle class.
- **Drastic Increases in Military and Border Spending:** Adding \$150 billion to defense and \$70 billion to border security—while slashing social safety nets—reveals skewed

priorities that do not reflect the will or welfare of the people.

- **Judicial and State Rights Restrictions:** Limiting federal court oversight and halting state regulation of artificial intelligence for a decade is an undemocratic overreach. It removes important checks and balances from our system and undermines both accountability and public safety.

If you choose to vote in favor of this legislation whether it passes or not, please know that many of us will consider every ethical and legal avenue available—including **filing formal ethics complaints** and, where applicable, **bar grievances for those in the legal profession**—to hold our representatives accountable. The Constitution grants you the duty to serve the people, not special interests or political pressure.

We respectfully ask that you listen to the voices of your constituents and stand on the right side of history by opposing the “*One Big Beautiful Bill Act (OBBBA)*”. We want leadership that reflects courage, integrity, and a commitment to democracy – not blind party loyalty.

We need leadership that values fairness, health, and the future of our country—not just partisan talking points or corporate handouts.

We are watching, and not only will you be primaried if you continue to vote against your constituents wishes, we will hold you personally accountable to your profession, especially if your profession includes an Oath, and a Code of Ethical and Professional Conduct.

Respectfully,
