

# NEXRA JANITORIAL

## Premium Deep Cleaning Guide

This guide explains exactly what is included in a Nexra Deep Cleaning service so you know where our time is spent and why a deep clean delivers dramatically different results than a standard maintenance visit.

### Before We Begin

We start every deep clean with preparation rather than immediately spraying chemicals.

- Walk through the home with you (when available) to understand priorities.
- Identify delicate materials, damaged surfaces, and special instructions.
- Protect floors and furniture where appropriate.
- Photograph pre-existing damage when necessary.
- Stage equipment to avoid blocking walkways.

### Whole Home Detailing

A deep clean focuses on areas that routine cleanings often miss.

- Remove cobwebs from ceilings, corners, molding, and wall transitions.
- Dust ceiling fans, light fixtures, vents, return grilles, and upper trim.
- Dust blinds individually, window sills, frames, tracks, and locks.
- Clean doors, frames, handles, light switches, and outlet covers.
- Spot clean washable wall marks and fingerprints.
- Dust décor, shelving, lamps, picture frames, furniture, and accessible backs.
- Vacuum furniture (when included), floor edges, corners, and under accessible furniture.
- Sweep and mop using floor-appropriate cleaning products.
- Perform a final room inspection for missed dust, streaks, hair, or footprints.

### Kitchen Deep Cleaning

Our kitchen service is one of the most labor-intensive portions of the visit.

- Degrease countertops, backsplash, cabinet fronts, handles, and trim.
- Detail sink, drain, faucet, sprayer, and surrounding fixtures.
- Clean microwave inside and out.
- Degrease stovetop, burner grates, knobs, and hood exterior.
- Clean appliance exteriors and polish stainless steel when applicable.
- Clean refrigerator and oven interiors when purchased as part of the service and emptied beforehand.
- Clean toe kicks, baseboards, corners, and hard-to-reach floor edges.
- Disinfect high-touch surfaces before completing the room.

### Bathroom Restoration

Our goal is to leave bathrooms feeling refreshed, sanitized, and polished.

- Scrub sinks, vanities, counters, tubs, showers, and toilets.

- Remove soap scum, body oils, and surface mineral deposits where safely possible.
- Clean shower glass, tracks, fixtures, shelves, niches, and corners.
- Detail mirrors until streak free.
- Disinfect high-touch areas including handles and switches.
- Vacuum and mop around toilets, vanities, and room edges.

## Bedrooms & Living Areas

We restore the spaces you use every day.

- Dust furniture, lamps, décor, electronics, shelves, and baseboards.
- Vacuum beneath accessible furniture and bed edges.
- Straighten pillows and blankets.
- Clean mirrors and interior glass.
- Leave the room presentation-ready.

## Final Quality Inspection

Before we consider the job complete, we perform another walkthrough.

- Inspect mirrors from multiple angles.
- Check corners, edges, and baseboards.
- Confirm trash removal and room staging.
- Verify faucets, appliance controls, and lights.
- Address any missed items before departure.

## What Deep Cleaning Does Not Include

Some services require additional time, specialty equipment, or restoration work.

- Permanent stain removal.
- Mold remediation.
- Paint, adhesive, or construction material removal.
- Heavy furniture moving.
- Repairs or maintenance work.
- Exterior window cleaning above reachable height.

## The Nexra Promise

- We don't rush through a checklist. We methodically clean each room from top to bottom using proven workflows and quality-control inspections.
- If something within the agreed scope was overlooked, contact us promptly and we'll work with you to address it.
