

Exceptional Art & Design invites you to:

A wide-angle photograph of the interior of the Grand Palais in Paris. The image captures the vast, circular space with its iconic glass and iron dome. In the center, a large, ornate statue stands on a tiered pedestal. Several people are visible, walking or standing, providing a sense of scale to the massive architecture. The lighting is bright, coming from the skylights in the dome.

Paris 2025: The trip in a nutshell

Join me in Paris this November to experience life in a city where style, art, tradition, and culture meet. From the elegant 1900 architecture of the Petit Palais to the cutting-edge contemporary design of the Bourse du Commerce, Paris will be the stunning backdrop for our art and culture journey.

What fascinates me about this city is that the places we will visit together are equally beautiful both inside and outside. We will dive into the city's rich past and delight in its vibrant present. From authentic food markets and café culture to world-class museums and intimate artist studio visits, there is pure joy in embracing *le bon vivre parisien*.

Hope to see you there!
