

ADDON FILTER CARTRIDGES

ADDON ENVIROTECH
Consultancy - Sales - Services

Product Code :

ADDON SPUN FILTER

PRODUCT DATA SHEET

1 INFORMATION

High Purity Filtration With Low Cost Melt Blown depth cartridges.

2 DESCRIPTIONS

ADDON Cartridges are the most economical high purity filter cartridges available. Featuring a graded density matrix of uniform polypropylene fibers, the ADDON filter provides consistent filtration for a wide variety of fluids. No fiber finish or surfactants are present to generate extractables leading to foaming or other undesirable effects on the filtrate.

ADDON Cartridges are available in nominal ratings of 1µm, 5µm, 10µm, 25 µm and 50µm.

Available in Sizes : 10" , 20" , 30" & 40" Length options.

Can replace any make of existing cartridge filter.

3 BENEFITS

- Thermally bonded melt blown fiber matrix provides dimensionally stable construction.
- Continuous fiber matrix prevents media migration and ensures consistent quality filtration performance.
- Superior inter-layer bonding eliminates contaminant unloading and channeling
- Narrow range fiber size optimizes consistency of filtration performance.
- Polypropylene construction provides broad chemical compatibility for a variety of applications.

4 APPLICATION

Prefilter for membranes.

Prefilter for Ultrafiltration.

Any filtration application for Water & Waste Water Treatment.

DI Water.

Portable Water.

5 OPERATING CONDITIONS

Change out ΔP : 1.5 - 1.8 Bar.

Flow rate : 16.5 lpm per 10 in.length.

Temperature : Max. 45 Deg Celcius.
