CREATIVE PROBLEM

Essential Skills Today's Students Need for Jobs in Tomorrow's Age of Automation

Educators are preparing students for a rapidly changing world in which automation, digital technologies, and competition are driving forces. Given the pace of change, it's no surprise that

employers are demanding new skills, like creative problem-solving, from graduates.

Adobe asked 2,000 educators, policymakers, and influencers worldwide to give us their thoughts on creative problem-solving and how it's being taught in educational institutions. Check out the results to see how you can integrate these skills into your curriculum and prepare your students for success.
