GUARANTEE

Every Radiance Aluminum Fence is backed by our Lifetime Limited Warranty. This guarantee covers our products against rust, defects in workmanship and materials, as well as chipping, peeling, or cracking of the Polyester TGIC finish. We guarantee our products will live up to the high standard reputation that Radiance Aluminum has earned.

FINISH

The Polyester TGIC technology advanced powder coating system used on Radiance Fence allows us to produce a high quality, long-lasting finish which is also environmentally friendly. When this system is applied to a Radiance Aluminum Fence, Polyester TGIC is twice the thickness and hardness of a typical acrylic, baked enamel finish, making it far more durable and fade and scratch resistant than other coatings.

MATERIALS

All Radiance Aluminum Fences are extruded of an exclusive high strength aluminum alloy called 6005-T5 alloy, with a minimum ultimate strength of 35,000 psi. We assemble every fence panel with stainless steel corrosion resistant screws, with heads painted to match the fence panel. Radiance Aluminum carries posts in varying thicknesses including 0.060, 0.080, 0.100 and 0.125, punched to accept the channel of the fence. All Radiance Aluminum accessories are of zinc diecast or cast aluminum and are powder coated to ensure their long lasting durability as well.

TESTED AND CONFIRMED TO SURPASS THE COMPETITION!
