A Mastergrain Certified Distributor

## ABOUT MILLWORK 360

---

Millwork 360 was founded with one core purpose in mind: to create custom mouldings and doors that reflect the highest degree of superior quality. Our commitment to our clients - and to exceptional craftsmanship - allows us to fulfill any residential or commercial product needs across the Southeastern United States. We strive to be the most dependable source for precise, beautiful, and durable products with short lead times and on-time deliveries.

## ABOUT MASTERGRAIN

---

MasterGrain products are a premium line of fiberglass door system components featuring the most authentic wood grain replication in the door industry. MasterGrain combines beauty and high quality construction to its fiberglass doors so you can see 'The Difference is in the Details.'

MasterGrain is proud of its investment in the Canadian and American manufacturing infrastructure, and truly understands the marketplace it serves. Through creativity, innovation and leading-edge technology, MasterGrain will continue to develop the finest door system components to protect and enhance your home.

## NVD GRAIN TECHNOLOGY

NVD Technology is a patented process that authentically replicates any natural surface. The door process begins by hand selecting the most desirable wood pieces to build a real wood door. A silicone casting accurately picks up the finest details of the wood grain and is transferred into a door mold using our NVD (Nickel Vapor Deposition) Technology. The mold produces fiberglass skins used on MasterGrain doors with random grain depths and all the natural characteristics of real wood making our doors virtually indistinguishable from real wood doors.

## EVEN OUR GLASS FRAMES ARE FIBERGLASS.

- Using MasterGrain's unique NVD process we created matching fiberglass frame for your glass inserts.
- Fiberglass frames are more rigid than plastic frames. This ensures a tight weather seal to the door and minimizes distortion.
- We created a unique plugless frame system that clips together. The best part is that you don't see any plugs or screw holes.
- With our traditional plugged system that screw together, most models tested have passed HVHZ impact and cycle testing.

## KENYON'S GLASS

Kenyon's Glass, an ODL Company, prides itself on being one of the leading manufacturers of custom decorative glass for the building industry.

Established in 2000 and originally located in Hilliard Ohio, Kenyon's Glass started in a 15,000 square foot facility producing custom decorative panels for window, door and cabinet manufacturers. The decorative glass produced by Kenyon's is typically installed in transoms, doors, windows of all types, as well as in cabinet doors, and uses coming; grooved glass; metal for a wrought iron look; as well as sand blasted glass.

By 2003, Kenyon's had outgrown its original facility, so a new 40,000 square foot facility was built in Grove City Ohio. Over a decade later, we continue to grow by being an innovator with decorative glass through design, quality and service in the United States.
