

# Coming Attraction:

## Lighthouse®

Northern Sea Oats, *Chasmanthium latifolium*

Carl Whitcomb, Lacebark Research, Stillwater, OK

Early spring seeds with young plant.

### Features

- Grows in almost any soil, wet or dry, sun or shade
- Grows 2 to 3 feet, with no drooping stems
- Flowers very early, and seeds mature quickly
- No observed diseases or deer damage
- Attractive all season even after frost
- Seeds are long lasting and great for arrangements

During extreme drought in full sun.

### History

Using *locally collected seeds*, only a few plants remained attractive in full sun. Twelve generations later, by collecting seed from sun / heat / drought tolerant parent plants, Lighthouse® appeared. Found more attractive when old tops are removed before new season growth starts.
