

COMMERCIAL LIGHTING

GEMSTONE LIGHTS®

Gemstone Lights® is a smart lighting system designed to enhance your business's unique lighting needs. Our sleek track lighting, in-house-developed app, and intuitive Hub2 controller work seamlessly together to ensure your business always looks its best. With the cloud-enabled Gemstone Lights® app, customizing your lighting has never been easier. Subscribe to calendars, adjust colors and patterns, and set timers—all with just a few taps, anytime, from anywhere.

02

GEMSTONE LIGHTS® TRACK

Our track is crafted from industrial-grade aluminum for exceptional durability and resistance to wear. With over 217 color options and 15+ track profiles available, we can customize our system to seamlessly match your business's architecture, style, and aesthetic.

03

COMMERCIAL TRACK

Our commercial track is designed to be used in side-mount applications. Commercial buildings often do not have a roof overhang, so this track was engineered to have the lights shine out at the perfect angle, custom to your building. This makes the lights more visible and buildings more noticeable from afar.

04

U CHANNEL TRACK

U-channel is a great option for unique applications. This track is extremely low profile, making it perfect for tight spaces or indoor lighting. The primary bracket can be mounted in a variety of different ways making it possible to have Gemstone Lights in virtually any place you choose.

HAT TRACK

Hat Track is fastened permanently to the soffit by sliding one side of the track under the J-trim of the fascia and inserting a color-matched screw into the other side or screwing the track in on both sides where J-trim isn't used.

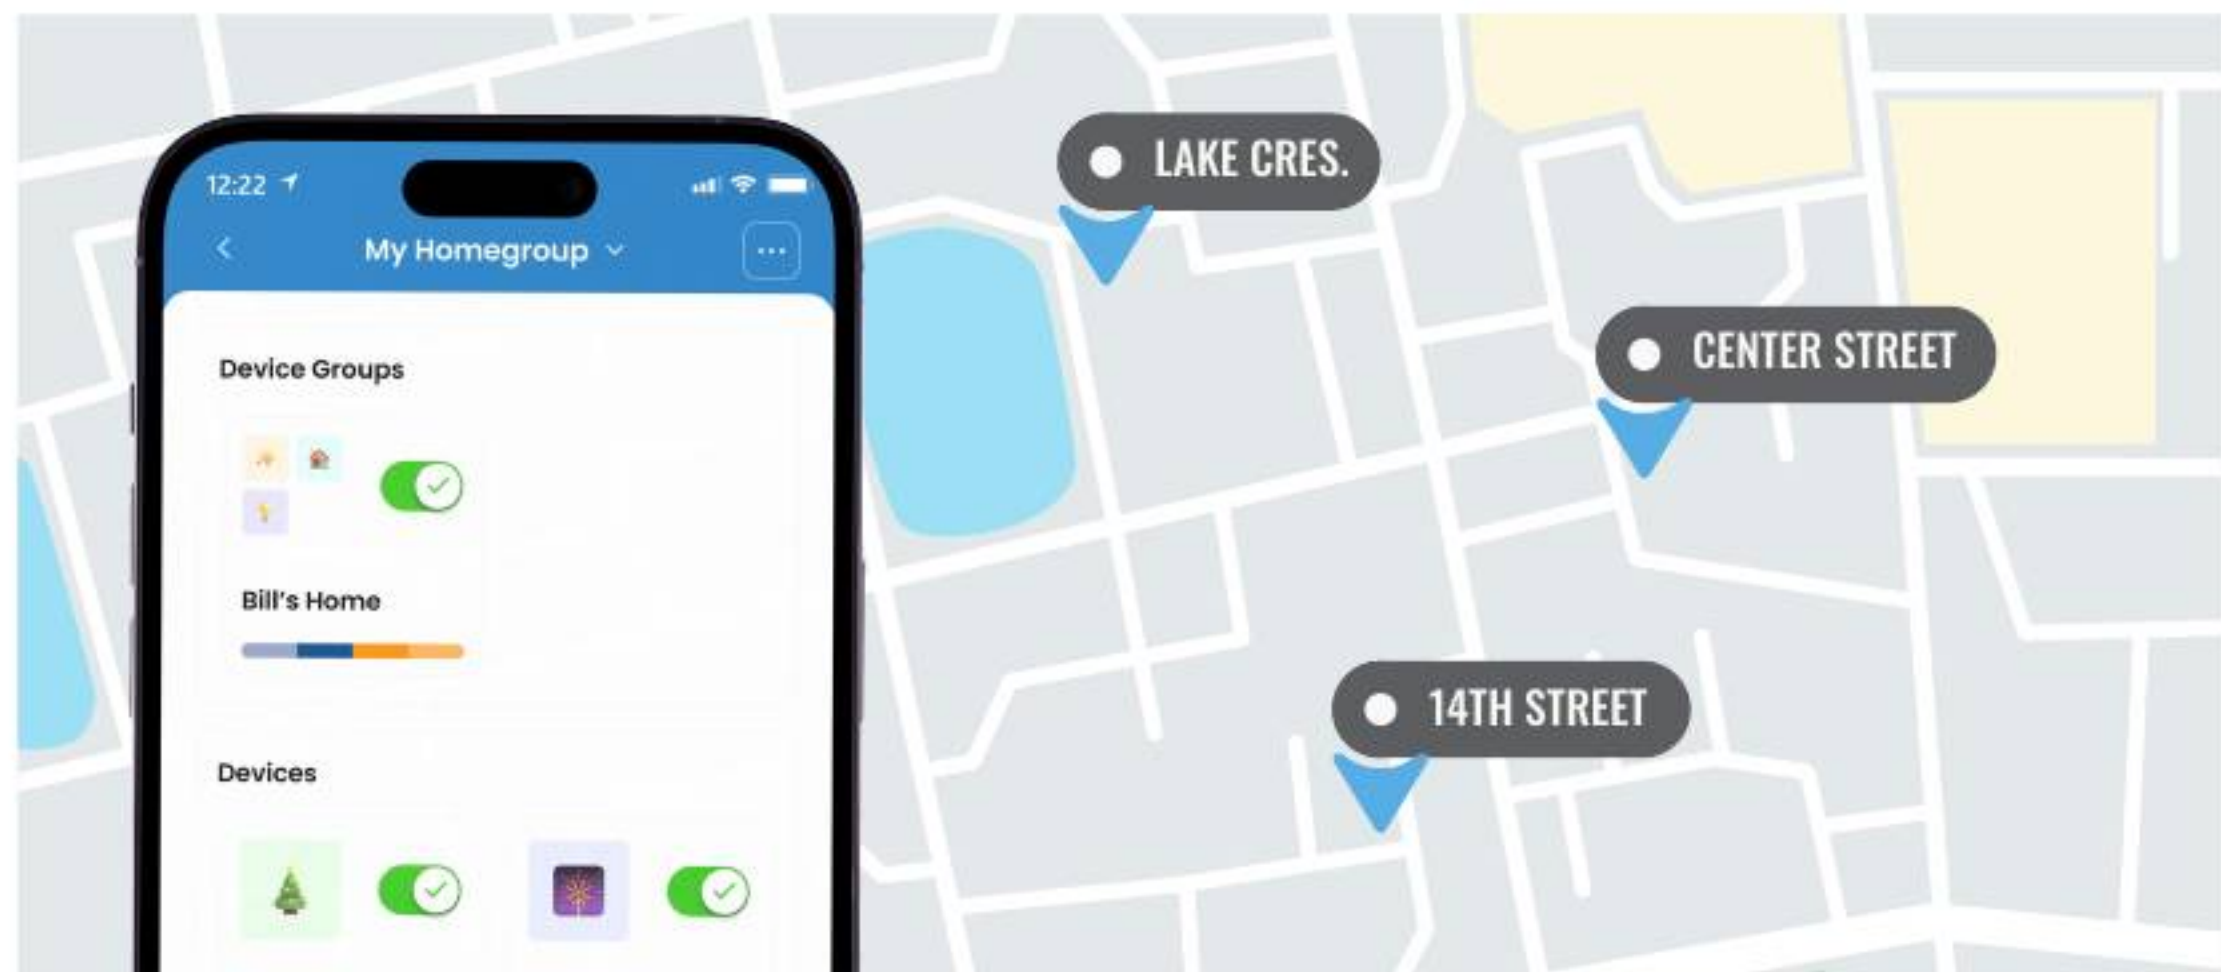

MULTI-PROPERTY FEATURES

Being cloud-enabled allows business owners and property managers to share the controller with multiple people including admin, security personnel and family members ensuring everyone who needs access to your lighting system, has it!

07

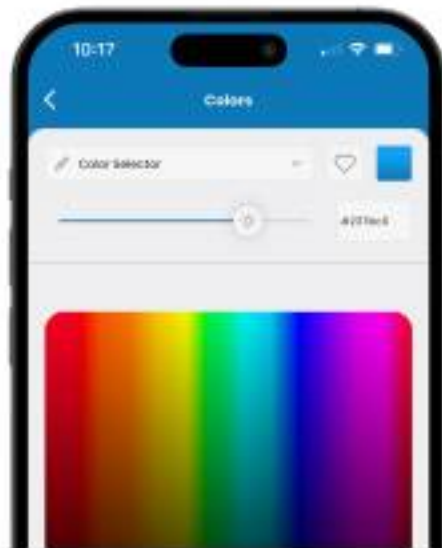

SECURITY LIGHTING

Enhance your building's security at night with automated timers and ambient lighting. Whether it's the front door, back door, side entrance, or all of the above, you can easily select which areas to illuminate and schedule exactly when the lights turn on.

GEMSTONE LIGHTS® APP

Unlock your creative potential with the Gemstone Lights® app. Customize and create your own colors and patterns while on the go with our cloud-enabled system.

COLOR CUSTOMIZATION

There are 3 different ways to choose your perfect color: Color selector, RGBW slider, or palettes. Easily save them as favorites for quick access.

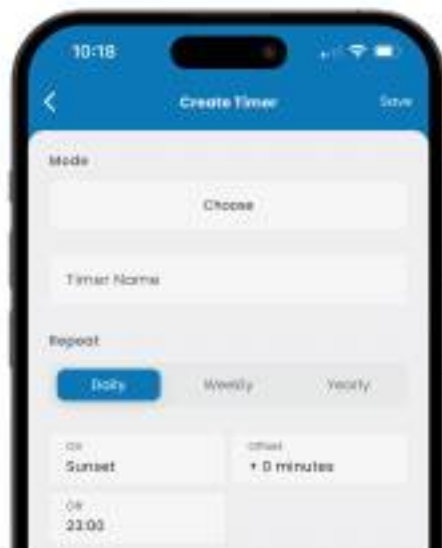

INDIVIDUALLY ADDRESSABLE LIGHTS AND ZONES

Gemstone Lights® smart LED lights allow you to control each light individually and create beautiful architectural patterns specific to your business.

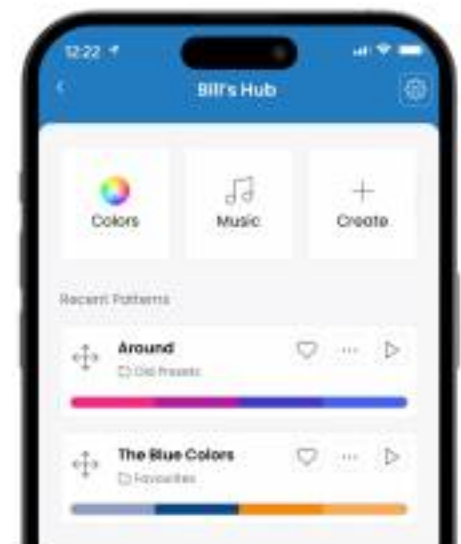

SCHEDULES AND TIMERS

Set up to 64 timers per controller to schedule patterns on specific days. Create custom timers, or use automated timers for sunset and sunrise.

DOWNLOADABLE PATTERNS

Choose from a variety of downloads available for holidays, sports teams, events, etc.

SHAREABLE PATTERNS AND FOLDERS

Add and create your own patterns and folders, then easily share them with your friends.

08

THE CLOUD-ENABLED ADVANTAGE

The Gemstone Lights® Hub2 controller is a cloud-enabled app available on iOS and Google Play. Enjoy a simplified and secure connection with a QR code linked directly to your controller. Control your lights from anywhere in the world—set timers, share devices, and run updates from any location with an internet connection. The Gemstone Lights® controller and app are packed with features, offering complete customization and control, with regular updates and new features to improve your experience.
