

ELEV8

RIGGING & CO.

Elevating Standards, One Lift at a Time

WIRE ROPE

Wire rope is available in a variety of types tailored for specific applications. The most frequently used include 6x19 FC or IWRC and 6x37 FC or IWRC.

WIRE ROPE LIFTING SLINGS

Wire rope slings come in various diameters and lengths, commonly featuring standard or thimble Flemish eyes, or different fittings spliced or swaged onto their ends.

HOOKS AND SWIVELS

Many industries rely on hooks and swivels, but not all are designed for lifting or swiveling under load. Misunderstanding their functions can lead to unexpected issues.

PLATE CLAMPS

Efficient devices for hoisting plate steel in both horizontal and vertical orientations. They can also be used to lift steel drums, pipes, and come in non-marring varieties for handling delicate items that must remain unblemished or unmarked.

SHACKLES

- Screw pin anchor shackle
- Bolt type anchor shackle
- Screw pin chain shackle
- Bolt type chain shackle

Available in carbon or alloy steel

FORGED WIRE ROPE CLIPS

When purchasing wire rope clips, it's essential to focus on the distinction between "malleable" and "forged" wire rope clips. We sell a variety of wire rope clips to meet your needs.

LIFTING CHAINS AND FITTINGS

Grade 80, 100, and 120 alloys are the most widely utilized chains and fittings in lifting applications.

HOISTS, TROLLEYS, BEAM CLAMPS

Hoists and lever pullers are versatile tools for lifting, equalizing, pulling, and securing loads. We offer chain hoists and lever pullers tailored to your needs.

CARGO SECUREMENT

We offer various products for the cargo securement industry, such as ratchet straps, chain assemblies, load binders, winch straps, and bungee cords.

ELECTRIC CHAIN HOISTS & MOTORIZED TROLLEYS

Electric hoists and trolleys are employed across several industries, such as automotive, mining, and manufacturing. If you need them, we offer these essential tools.

SNATCH BLOCKS

We offer a variety of snatch blocks designed for wire rope, similar to our other high-quality products. Our selection includes top-notch domestic blocks as well as excellent brand-name imports.

TURNBUCKLES

Forged turnbuckles are used in various applications and are to be used strictly for straight or in-line applications. They are great to use for line tensioning, support, guying and even lifting as long as you are using rated turnbuckles.

LIFTING CHAIN COMPONENTS

There are numerous types of lifting chain components available; we carry a wide selection of Grade 100 components along with some Grade 80 lifting chain options.

SWIVEL HOIST RINGS

Swivel Hoist Rings are available in both imperial and metric sizes, and you can choose between standard options or those equipped with a swivel bearing for rotation while under load.

SYNTHETIC ROPE and SYNTHETIC LIFTING SLINGS

synthetic ropes can be found on the market, and depending on your specific application, there are numerous options to choose from. Some rope can be strong and a good alternative to wire rope if it meets the load requirements.
