\$3,970 Grant Funding for Water System

The Borough received additional Community Development Block Grant Funding of \$3,970.00 to pay for the implementation of the new water system software and a new meter reading device.

New Propane Generator Installed

The new propane generator has been installed and is in-service at our reservoir. The new generator will automatically start when there is an electrical disruption to the water pump. The generator and its installation cost \$6,900.00 and was partially funded by the PA Small Water & Sewer Grant Program.

Two New Fire Hydrants

Two new fire hydrants were installed on Main Street. The replaced fire hydrants date back to 1908. The cost of the new hydrants was about \$11,000 for parts and installation. The cost of the fire hydrants was also partially funded by the PA Small Water & Sewer Grant Program.

Bushes and Shrubs Growing into Streets

Borough Maintenance would like to remind residents to please keep their bushes and shrubs from growing onto Borough streets and sidewalks. Unkept bushes and shrubs can be hazardous to pedestrians and vehicles. We thank you for your cooperation.

New Water Tank

The Community Development Block Grant funded a new water tank for the Borough's water system. The Grant was awarded for \$275,000. Engineering is expected to begin this Fall.
