

**4X's the Capacity, 100's of Devices, >99.99% Efficacy, < 30 Seconds**

**Electronics | Medical Tools | Supplies | Personal Effects**

Rapid All-In-One Sanitation Station

Fulfills CDC Guidelines for Re-Use and Extended Use. Over 23 Models Verified

Large Capacity Standardizes the Decontamination Protocol for 100's of Tools and Sensitive Electronics

Protecting Employees and the Workspace

The "RDS" will do what sanitation wipes cannot, provide a hands-free, chemical-free decontamination of sensitive Electronics, Devices, Tools, Personal Effects and Supplies in less than 30 seconds, with guaranteed results every time. \*

It is the current day proven solution to extending PPE supply inventories and preventing the cross-contamination of the SARS-CoV-2 virus. The RDS-32a can decontaminate up to eight [8] N95 Masks simultaneously and over 5,000 per day.

In a COVID-19 world, mobile phones, tablets and stethoscopes are not the only challenge. There are hundreds of items large and small that require daily decontamination for safe handling and patient use.

The 32a Series offers the largest decontamination capacity and the fastest throughput available. From the ICU to Sterile Processing, the Workspace to Logistics, RDS-32a has been deployed in every area. It is the most versatile UVC cabinet solution on the market today.

- Highest UVC Germicidal Dosage
- Large Size /Fast Throughput fits 100's Items
- Confirmation of Efficacy on Every Cycle \*
- For both Wired & Wireless Devices
- Deployed as Fixed & Mobile Applications
- Hand Sanitation Solution [Option]
- Compliant: Made in America Act

**- INDEPENDENTLY TESTED & VERIFIED -**

Antimicrobial Test Laboratories  
Reports #: NG5770 & NG5593

Exceeds FDA, HHS and Center for Devices and Radiological Health Guidelines for performance and safety. Independently verified in terminating SARS-CoV-2, C-diff Spores, MRSA, MERS, Listeria, Ebola, Norovirus and the Coronavirus.

\* Patented Dosage Monitoring System guarantees decontamination efficacy

## **A HIGHER STATE OF CLEAN vs STANDARD SANITATION METHODS**

Currently deployed nationally at the top Health Care Institutions and numerous Government entities, the RDS-32 product series will quickly impact hand sanitation compliance, patient and employee safety, reduce your supply costs and improve the ROI at the bottom-line. [Documented]

As a new protocol standard for decontaminating sensitive electronics, the RDS systems are faster, easier, more convenient and provide the kind of chemical-free, warranty-friendly, decontamination solution long sought after by healthcare facilities.

Ask about our Patient Supply Savings Program with a documented ROI of \$100,000 [s]
