Our Story

In 1991, one man began making bed sheets in a small two-room space in Karachi, Pakistan. Mazhar Javed Khan had made his journey to the industrial hub of Pakistan with only one dream: to inspire global confidence in his products.

Over its three decades of existence, Al Hadi Textile has gained global recognition and become a prominent name in textile manufacturing. Our strong reputation of honesty and integrity has helped us establish lasting partnerships with customers in Europe, North America and beyond.

We specialise in producing high quality knitted home textile and apparel, and have been continually innovating to expand our product offerings, align our production to sustainability principles and deliver to ensure complete customer satisfaction.

1991

Al Hadi Textile established.

1996

Al Hadi Textile trademark licensed.

1998

New production unit purchased for in-house knitting and cut-to-pack.

2000

Dyeing and finishing facilities added in-house and doubled production capacity.

2001

ISO-19001 certified.

2007

A new dyeing unit constructed and commissioned and production capacity doubled.

2009

Oeko-tex Class 1 certified.

2014

SA8000 certified.

2017

BSCI and GOTS certified.

2018

Production started in the newly constructed Lahore facility and capacity increased three-fold.

2019

Oeko-tex STeP and Made in Green certified.

2021

Al Hadi Apparel unit added.

Current Capabilities

Manufacturing

30,000 kg fabric per day
Knitted and wet processed
through our facilities

60,000 pcs per day
45,000 pcs of home textile,
15,000 pcs of apparel

500,000 sq ft production area
Home textile and apparel
facilities combined

Products

Home Textile:

Fitted Sheets

Jersey Bedding

Baby Products

Apparel:

Casual Wear

Nightwear

Sports Wear

Children's Wear

Facilities: Fabrication

Knitting

In-house circular knitting facilities using the highest quality, ethically sourced yarns.

Dyeing

Energy efficient dyeing machines using certified and safe dyes and chemicals.

Finishing

European stenters, dryers and compactors, offering both open-width and tubular finish.

Facilities: Home Textile

Cutting

Experienced cutting staff, allowing fabric to be cut to customer specifications with minimal waste.

Sewing

Sewing department with 50 sewing lines, allowing for over 45,000 pieces to be produced per day.

Packing and Warehouse

A meticulous packing team ensuring every last piece is neatly packed as per customer requirements.

Facilities: Apparel

CAD and Cutting

Computerised pattern making for each garment provides cut sizes to our experienced cutting team.

Screen Printing

In-house screen printing facility for garments of all types.

Sewing

Sewing department with 20 sewing lines, allowing for 15,000 pieces to be produced daily.

Packing and Warehouse

A meticulous packing team ensuring every last piece is neatly packed as per customer requirements.

Products: Home Textile

With over 30 years of experience in the knitted home textile space, our core products include:

Fitted Sheets

Jersey Bedding

Baby Products

Fitted Sheets

Super Premium Range

235 GSM Lycra Jersey
95% Combed Cotton, 5% Elastane

190 GSM Interlock
100% Combed Cotton

180 GSM Lycra Jersey
97% Combed Cotton, 3% Elastane

Premium Range

150 GSM Cotton Jersey
100% Combed Cotton
Optional Aloe Vera & Enzyme Finish

150-160 GSM Elastane Jersey
95% Combed Cotton, 5% Elastane

170 GSM Plaited Terry
80% Combed Cotton, 20% Polyester

Fitted Sheets

Basic Range

130 GSM Cotton Jersey
100% Carded Cotton

150-160 GSM Elastane Jersey
97% Carded Cotton, 3% Elastane

Triblend
80% Carded Cotton, 20% Polyester

Economy Range

120 GSM Cotton Jersey
100% Carded Cotton

120 GSM Poly-Cotton Jersey
50% Cotton, 50% Polyester

150 GSM Terry
80% Carded Cotton, 20% Polyester

Jersey Bedding

Standard Range

Printed Bed Sets

100% Cotton
150 GSM

Melange Bed Sets

100% Cotton / Tri-blend Jersey
150 GSM

Uni-dyed Bed Sets

100% Cotton
150 GSM

Special Developments

Mechanical Blend Striped

Jersey fabric
140 GSM

Seer Jersey

100% Cotton

Garment Washed

100% Cotton Bedlinen
Vintage Look

Baby Products

Sheets

Crib / Cot Sheets

Printed and Dyed

Interlock Blanket
Double jersey.
Printed and Dyed

Baby Products

Wraps

Interlock Baby Sling
100% Cotton

Poly-Spandex Baby Sling
Polyester and Spandex Blend

Baby Swaddle Wrap
Includes Zipper and Velcro Closure

Feeding Articles

3-layered Burp Cloth
Interlock, Fleece, Jersey
Extra Absorbent

Baby Bibs
Styles including Halo Bibs, Snap Bibs
and Bandana Bibs

Nursing Cover Poncho
95% Cotton, 5% Elastane

Products: Apparel

Our core apparel products can be divided into four main categories:

Casual Wear

Sports Wear

Nightwear

Children's Wear

Casual Wear

Menswear

T-Shirts and Polos

Cotton Jersey and Blends
Screen printed or embroidered.

Fleece Hoodie

Pullover or with zipper closure
Screen printed or embroidered.

Jogger Pants / Shorts

Fleece, terry or jersey fabric
Screen printed or embroidered

Womenswear

Fashion Knitwear

Poly-cotton fleece
Colour block or stripe design

Sweat-dress

Poly-cotton fleece
Oversized dress

Jogger Pants / Shorts

Fleece, terry or jersey fabric
Screen printed or embroidered

Sports Wear

Menswear

Mesh T-Shirt
100% Polyester Mesh
Jersey Fabric

Mesh Shorts
100% Polyester Mesh
Jersey Fabric

Scuba Tracksuit
Featuring premium double
knit fabric

Womenswear

Hoodie with Side Slit
Cotton Terry
Other blends available

Crop Tee
Cotton Jersey
Other blends available

Trouser with Side Slit
Cotton Terry
Other blends available

Nightwear

Menswear

Short Pyjamas

100% Cotton Jersey
Printed, striped or uni-dyed

Long Pyjamas

100% Cotton Jersey
Printed, striped or uni-dyed

Night Gown

Knit Terry Fabric
Available in Uni-dyed

Womenswear

Short Pyjamas

100% Cotton Jersey
Printed, striped or uni-dyed

Long Pyjamas

100% Cotton Jersey
Printed, striped or uni-dyed

Night Dress

100% Cotton Jersey

Regular / Knot Style

Toddler and Older

Track Suit

Terry Fabric
Snap Button Closure Neck

Printed / Embroidered Hoodie

Poly-cotton
Front Pocket

Jog Shorts / Trousers

Poly-cotton Terry
String Tie

Available Fabric Technologies

Quality Assurance

Al Hadi Textile has a multi-layered quality assurance system in place to ensure only the best quality products make their way to our customers.

With the use of Quality Control Gateways and dedicated staff, our quality team is able to promptly identify and remedy faults at any stage of the production process.

Quality Control Gateways

1

G1: Post Knitting

Each fabric roll is checked on a light table for defects. Fabric rolls with no knit defects are issued to our dyeing department.

2

G2: Post Dyeing

Each lot is checked against a standard for shade (if colour) or CIE whiteness level (if white). For this purpose we have a spectrophotometer (Datacolor) in our lab to give accurate results. If there is a variation beyond the allowance ($\Delta E > 1$), we re-dye the lot to correct it.

3

G3: Post Finishing

Swatches are taken from finished lots to ensure continuity of shade, GSM and shrinkage values. Any lots that do not fall within the required parameters are re-finished by us if possible. If the finished GSM deviates more than -3% / $+10\%$, the entire lot is rejected.

4

G4: Pre Cutting

Fabric rolls are checked once more to ensure there are no holes, stains or other defects. Rolls with major defects more than the allowable tolerance are sent back to be improved if possible or rejected if not.

5

G5: Sewing Stage

Line checkers randomly check sewed pieces for stitching defects and instruct workers to adjust machines if necessary. Line checkers also randomly pick sewed pieces from each lot to check piece weight and ensure it is within the allowable range.

6

G6: Two-Step Checking

Finished pieces are first checked on top of a light table for faults. In the next checking stage, each piece is checked in a well-lit area where any defects missed from the first stage can be spotted. All approved pieces move forward, while rejects are sent to the relevant rework station.

7

G7: Final Inspection

During the packing stage, line checkers randomly check packed bundles for any issues. Before final shipment, a pre-shipment inspection as per AQL 2.5 is conducted.

Sustainability

Being a textile manufacturer, our sustainability strategy focuses on three key aspects:

energy efficiency, resource efficiency and developing greener alternatives of regular products to offer customers.

Energy Efficiency

State-of-the-art, energy efficient machinery, allowing for lower energy intensity of the production process.

A 600 kW solar panel system currently supplies power to our factory

Our goal is to increase the current solar panel system to 2 MW by 2026 to further reduce our footprint.

Wastewater Treatment

Our effluent treatment and reverse osmosis plant purifies wastewater expended from machinery.

Our effluent water is therefore environmentally safe and reusable. It is currently used for irrigation.

Our goal is to use 30% of this effluent water in our production by 2025.

Post-production Waste

Excess fabric and waste leftover to be sold to yarn mills to regenerate yarns. This project is currently at its pilot stage.

Carton / paper waste is sold to paper mills to make recycled paper.

Plastic waste is sold to polybag factories to make recycled polybags.

Eco-friendly Packaging

FSC certified recycled paper box packaging available in both envelope and “pizza box” styles.

Fully colour-printed paper box with window to show the fabric inside.

Self-fabric bag packaging, using waste fabric from production.

Sustainable Yarns

Additional Certifications

Our Customers

Our primary customer base is located in Europe and North America and we are proud to have worked with some of the best brands in the business, from discounters, to retailers and Amazon based businesses.
