
Name _____

Date _____

**7****REMEMBER**

1. Place parentheses to make the equation true.

$$\frac{1}{2} \times 7 \div \frac{1}{4} + 6 = 20$$

2. Evaluate.

$$3 \times \left(\frac{2}{3} \times 6 \right) + \left(7 \div \frac{1}{3} \right)$$

Write an expression that can be used to solve the problem.

3. Sasha has 7 brownies. She eats 3 brownies, and then divides each of the remaining brownies in half. How many brownie pieces does Sasha have now?
