

Name _____

Date _____

1. Mr. Sharma uses boards to build a raised garden bed in his backyard. The measurements of the boards are shown.

- a. What is the total length of boards Mr. Sharma uses to build the garden bed?
- b. How much of his backyard does the garden bed cover?
- c. Mr. Sharma fills the garden bed with dirt. When the garden bed is full, the height of the dirt is 2 feet. How much dirt does it take to fill the garden bed?

REMEMBER

2. Explain why the number sentence is true.

$$\frac{7}{7} \times 6 = 6$$

-
3. Multiply. Show your work.

$$3\frac{1}{2} \times 1\frac{1}{3} =$$
