

**16**

Name _____

Date _____

1. Estimate the partial quotients as you divide. The first estimate is started for you. Make as many estimates as needed. Then check your work.

$$6,743 \div 21$$

2	1	)	6,	7	4	3

Estimates:

$$6,000 \div 20 = \underline{\hspace{2cm}}$$

Check:

$$6,743 = \underline{\hspace{2cm}} \times 21 + \underline{\hspace{2cm}}$$

Quotient: _____ Remainder: _____

2. Divide. Then check your work.

$$1,687 \div 33$$

Check:

Quotient: _____ Remainder: _____

REMEMBER

3. Compare the fractions by using $>$, $=$, or $<$. Explain your thinking by using pictures, numbers, or words.

$$\frac{3}{4} \text{ ————— } \frac{2}{6}$$
