

Name

Date

Use the graph to complete parts (a)–(e).

- a. How long does it take Tyler to ride the first 20 miles?
- b. How many miles does Tyler ride in 6 hours?
- c. What does the point located at (4, 40) mean?
- d. How many miles does Tyler ride between hours 2 and 3?
- e. Look at the points representing the total distance Tyler rode. Why don't these points appear to lie on the same line?
