***REFUEL IN  
SECONDS***

**Box Box** leverages AI-powered smart cooler technology to advance your vending machine out of the dark ages. An AI-powered Box Box offers temperature control at minimal levels of energy consumption, provides greater food/drink variety (and customization), real time data on customer habits (and inventory levels), and a faster checkout experience.

- **Zero Cost Benefit:** Provides your employee, tenant or customer with 24/7 access to a diverse inventory of food, drink, or other options (fully customizable product selection depending on site's preferences)
- **Zero Cost Installation:** Our team at Box Box handles shipping, transport and installation at no cost for however many Box Box smart coolers requested for a particular site
- **Zero Cost Same-Day Maintenance Guarantee:** 24/7 technical support
- **A Modern Look:** Box Box smart coolers provide a more modern aesthetic than traditional, outdated vending machines that better match your corporate office space, apartment complex, or work site
- **Weekly Restocking Guarantee:** AI-powered inventory tracking provides our team with real-time data on Box Box food or drink products doing better or worse than others at a particular site (able to pivot quickly to the site's preference)
- **Temperature Control:** Maintains higher food quality than traditional vending machines at minimal levels of energy consumption

# BOX BOX VENDING

## Partnership Next Steps

- **Schedule a Walkthrough:** Assess placement location(s)
- **Box Box Vending Solutions:** Select optimal Box Box smart cooler model ranging from small, single-door to larger double-door options (our premium suppliers include Genius Vend, HAHV Vending, Stockwell Smart Store, Micromart Smart Store)
- **Customize Inventory:** Tailor product categories based on site preference
- **Partnership Agreement:** Commit to a basic agreement outlining terms, duration, and service
- **Installation and Service Begins!**
