

# Risk Assessment and Management

It is not possible to control or manage 100% of risk, but knowing what do before, during, and after an event will mitigate the damage and harm. Identifying potential hazards and risks and making it part of the day to day business is important. Safety should be the first priority as every business must face the reality of risks and hazards.

Through our Risk Assessment and Management course participants will be aware of hazards and risks they did not realise were around their workplace. Identifying hazards through proper procedures will provide participants the ability to prevent that accident before it occurs. Limiting and removing potential dangers through Risk Assessment will be an incredible investment.

## Course Objectives:

- Identify hazards and risks
- Update control measures
- Grasp the fundamentals of accident reports
- Identify risk management techniques
- Outline a disaster recovery plan
- Communicate to the organisation
