

STUD SERVICE CONTRACT

I, Dayna Padgett, hereafter referred to as Stud Dog Owner, am legal owner of frozen semen obtained from the following live canine, hereafter referred to as Stud Dog:

(*registered name*), AKC # (*number*), CKC # (*number*), (*registry*) # (*number*), AKC DNA profile # (*number*), OFA DNA profile # (*number*), microchip # (*number*), a (*color*), male Alaskan Malamute, born on (*dd month, 20yy*), with the following parentage:

Sire: (*registered name + titles*)

Dam: (*registered name + titles*)

Completed Health and Genetic Testing:

OFA Website Link:

Embark Website Link:

Color Genotype:

CHIC #:

Hip/Elbow:

Eye:

Thyroid:

Cardiac:

Dentition:

Genetic Status:

Proof of all completed health and genetic testing for Dog attached.

And I, (*name*) hereafter referred to as Bitch Owner, and legal owner or lessee of the following live canine, hereinafter referred to as Bitch:

(*registered name*), (*registry/registries*) # (*number*), AKC DNA profile # (*number*), microchip # (*number*), (*color*), female Alaskan Malamute, born on (*dd month, 20yy*), with the following parentage:

Sire: (*registered name + titles*)

Dam: (*registered name + titles*)

Stud Dog Owner agrees to provide stud service from the above mentioned Stud Dog, to the above mentioned Bitch, under the following terms and conditions, and no other expressed or implied:

Stud Service Fee: \$_____

Sperm Count At Collection:

Motility Count At Collection:

[] Breeder has obtained the following health tests, AND all results were negative: (Brucella Canis Panel (IFT and RSAT) from TVMDL; CP-16 Canine Lost Pregnancy Profile from Health Gene, and guarded cervical culture swab) AND Bitch has not, and will not reach her 6th birthday on or before the expected whelp date. A return service will be granted in event of a failed breeding.

[] Breeder has not obtained all of the following health tests, OR any results were positive or suspect (Brucella Canis Panel (IFT and RSAT) from TVMDL; CP-16 Canine Lost Pregnancy Profile from Health Gene, and guarded cervical culture swab), OR Bitch has or will have reached her 6th birthday on or before the expected whelp date. No return service will be granted for a failed breeding.

Stud Service is good for AI only. Stud Service fee plus semen or travel fee must be paid in full, with payment cleared, prior to Bitch's heat cycle.

[] Stud service is to be granted using a side by side AI at Lake Alfred Animal Hospital. Breeder has already called to put credit card on file for all insemination fees related to this breeding. Insemination fees include office visit for Bitch and Stud Dog, Bitch exam, any lab work, final progesterone test, collection, and insemination.

[] Stud Service is to be granted using a AI from semen previously collected and stored at Lake Alfred Animal Hospital. Breeder has already called to put credit card on file for all insemination fees related to this breeding. Insemination fees include office visit for Bitch and Stud Dog, Bitch exam, any lab work, final progesterone test, and insemination.

[] Stud Service is to be granted using frozen semen shipped from ICSB. Semen will be shipped directly to Breeder's veterinarian.

Stud Service Fee only covers the actual stud service and semen fees/travel to Lake Alfred Animal Hospital, and for litter registration. Stud Dog Owner has no responsibility towards caring for Bitch and resulting puppies. Stud Service Fee does not cover any breeding expenses, including pre-breeding health testing and insemination fees, or any care of Bitch or puppies, including extra feeding and supplementation, c-section, whelping supplies, microchipping or DNA testing of Bitch or puppies, or individual puppy registration.

Any veterinarian correspondence, including pre-breeding test results, Relaxin test, and ultrasound, must be mailed or faxed to Stud Dog Owner directly from veterinarian, and must be on office letterhead and contain clinic name and number, and veterinarian's name and license number, Bitch Owner's name, and Bitch's registered name and microchip number. Stud Dog Owner will not accept records sent by Bitch Owner.

As soon as Bitch begins to exhibit physical signs of heat cycle (spotting, swelling, etc.), Breeder should begin to get the following tests: Brucella Canis Panel (IFT and RSAT) from TVMDL; CP-16 Canine Lost Pregnancy Profile from Health Gene, and guarded cervical culture swab. If Breeder chooses not to get these tests, or if any results are positive or suspect, there will be no return service in the event of a failed breeding.

Breeder understands that numerous progesterone tests must be done to dictate optimal breeding dates, as stated below Stud Dog Owner must receive the following reports on levels:

Progesterone levels of 0.94 ng/ml, Breeder must contact Stud Dog Owner to begin the process of shipping semen to Breeder's veterinarian or plan for travel to Lake Alfred Animal Hospital.

Progesterone levels of 4.09 - 5.66 ng/ml - Ovulation. Pinpoint for 28 day Relaxin test and 55 day ultrasound.

Progesterone levels of 10.06 - 20.13 ng/ml - Eggs are mature enough to be fertilized and Bitch should be inseminated this day.

If Bitch is not inseminated when levels are 10.06 - 20.13 ng/ml, there will be no return service in the event of a failed breeding. Bitch Owner must send statement from Veterinarian showing progesterone levels at time of insemination.

Bitch Owner understands that it may take several days to get the semen transported to the veterinarian, so it is critical to inform Stud Dog Owner as soon as progesterone levels begin to rise. At 0.94 ng/ml, most bitches will need to be inseminated in about 4 - 6 days.

Bitch may be inseminated vaginally, trans-cervically, or surgically, whichever Breeder and Breeder's veterinarian think is in Bitch's best interest.

Breeder understands that tank rental for semen shipment must be returned immediately to

International Canine Semen Bank. Stud Service Fee only covers 7 days for tank rental. If tank is not returned within 7 days, there are late fees assessed. Litter registration will not be signed or authorized until tank is returned and Breeder reimburses Stud Dog Owner for any and all late fees or replacement costs for tank.

Breeder agrees and understands that Stud Dog Owner will not sign litter registration until litter is born. Breeder must have veterinarian fill out the Frozen Semen Litter Registration application at time of insemination. This must be sent to Stud Dog Owner. When Breeder informs Stud Dog Owner that litter has arrived, Stud Dog Owner will fill out and sign litter registration application, and submit it to proper registry(ies). Under no circumstance, will signed litter registration application be sent to Breeder for submission.

If Breeder does not inform Stud Dog Owner of litter's arrival within 70 days after ovulation, Stud Dog Owner is under no obligation to sign and submit, or otherwise authorize litter registration.

Breeder must get dated Relaxin Pregnancy test at 28 days after ovulation as dictated by progesterone levels of 4.09 - 5.66 ng/ml. If Relaxin test is negative, this means Bitch did not conceive and is not pregnant. Stud Dog Owner will grant one return service if Bitch qualifies for return service.

If Relaxin test is positive, but Bitch does not deliver puppies, Breeder must have dated ultrasound taken 55 days after ovulation as dictated by progesterone levels of 5 ng/ml. If ultrasound shows no litter, Stud Dog Owner will grant one return service at the next cycle if Bitch qualifies for return service.

If Breeder does not get Relaxin Pregnancy test, there will be no return service if there is no litter.

If Bitch is bred by another male during this heat cycle, whether accidentally or intentionally, Stud Dog Owner does not guarantee any resulting puppies will be sired by Stud Dog. If all puppies are sired by another stud dog, or male, there will be no return service granted.

If return service is in order, Stud Dog Owner will grant 1 repeat service between same Bitch and Stud Dog at the next heat cycle. Breeder will have to pay semen fee/travel expenses and all insemination costs again. If Breeder's veterinarian determines that breeding next heat cycle will be detrimental to the Bitch, return service will be held until Bitch is healthy and sound enough to breed. If Bitch is permanently unavailable for repeat service, Stud Dog Owner will grant repeat service to a different Bitch, provided Bitch meets Stud Dog Owner's criteria.

If return service does not produce a litter, Breeder will receive a return service at ½ price to a different Bitch.

If a different Bitch is used, there is no time limit for return service.

If Stud Dog is permanently unavailable for repeat service, Stud Dog Owner reserves the right to choose an alternate stud dog for repeat service .

Stud Dog Owner does not warrant size of litter, or size, health, or quality of any puppies produced. Stud Dog Owner also does not warrant that any puppies born live will survive. Even one puppy, born dead or alive constitutes a successful breeding, and no return service will be given.

Breeder is sole owner of all puppies produced in this breeding. Stud Dog Owner will have no say in the care, raising, or disposition of any puppies produced. Stud Dog Owner has no claim to any ownership of any puppies produced, nor to any money made on the sale of such puppies. Stud Dog Owner's kennel name will not be used to register any puppies.

Stud Dog Owner will not warrant or guarantee puppies produced. Breeder must offer any and all warranties and guarantees to Breeder's puppy buyers. In event of health or conformation issues in puppies, Breeder must inform Stud Dog Owner as soon as possible.

Stud Dog Owner is also under no obligation to screen potential puppy buyers for Breeder or to write up contracts for Breeder.

Breeder must inform Stud Dog Owner of registered names for each puppy in the litter by 6 months of age. This is only for Stud Dog Owner's records.

~~~~~  
We understand that if any dispute arises out of this contract, such dispute will be handled and resolved only between Breeder and Stud Dog Owner and legal representatives hired by parties. We understand that neither party will take the dispute to social media or any internet forum or discuss the dispute with any other party during resolution time. After resolution, the dispute may be posted on social media and internet forums or discussed freely, but only with evidence-based facts. Any unproven allegations posted on social media or internet forums, or discussed in person, will be considered libel or slander, and the posting/discussing party will be legally and financially responsible for any damages resulting from such posting/discussion.

All disputes will be handled by mediation in Stud Dog Owner's county at Breeder's expense. If mediation does not resolve such dispute, we agree that litigation will be handled by civil court in Stud Dog Owner's county at Breeder's expense.

We, the undersigned, testify that we have read, understand, and agree to all terms and conditions expressed herein.

This contract, and all terms and conditions was approved by both parties on this      day of month, 20yy.
