

Tecnotitan — 30-Second Elevator Pitch

Tecnotitan is building Latin America's first AI mega-company — an ecosystem that combines AI software, robotics, cybersecurity, and digital experiences.

Our flagship includes Tracy AI, a 24/7 virtual phone assistant for SMBs, along with the simplest CRM ever built. We're also developing autonomous robots for agriculture and manufacturing, plus AI-powered cybersecurity systems.

LATAM is massively underserved in automation, and our team is uniquely positioned to lead this transformation.

We're raising capital and open to investor introductions.
