## Guarantee

The Electrolux® Cleaner which you receive herewith has been thoroughly tested at the factory of Electrolux Corporation in Old Greenwich, Connecticut. Electrolux Corporation hereby guarantees for a period of two years from date of purchase from Electrolux that upon return of the Cleaner to an Electrolux office within that period, it will repair or replace, free of cost to you, any part of such Cleaner which our examination shall disclose to be defective in workmanship or material, except that with respect to the hose, the wands, the detachable electric cord (if any), the cleaning tools and other attachments including the rug washer and the power nozzle, such guarantee shall be limited to a period of one year from date of such purchase.

# Congratulations

...and welcome to the family of happy Electrolux users. You now have in your own home one of America's finest, easiest-to-use home-cleaning and home-care tools: the new Electrolux® Cleaner—Model L. It's ready and eager to go to work for you.

As your friendly Electrolux man, I've already had the privilege of showing you how much easier your Electrolux makes your home-cleaning. Now in this little book, I'm going to answer all the questions you might have about using your Electrolux Cleaner and its work-saving attachments.

Read it over carefully—it will give you many ideas for getting the most out of your new cleaner.

If you ever have any additional questions about your Electrolux Cleaner...or if you want to find out more about one of the other fine Electrolux products for complete home maintenance...be sure to write or call me at your nearest Electrolux branch. I'll be glad to help.

Once again—thank you, and congratulations on joining the millions of satisfied home-makers who clean their homes the "Electrolux Way."

*Your friendly Electrolux Man*

let's get acquainted with your new  
**ELECTROLUX®**

Automatic Cord Winder is handy optional  
attachment for your cleaner

Blower End

Cord Holder

Swivel-connector

Multi-purpose floor tool

Two-section Wand

Hose Handle

Vacuum Adjuster

# *cleaner and its work-saving attachments*

On-off switch

Clip for small tool

Upholstery tool-dusting brush

Button to Open Cover

Front Cover

Suction End

Electric Socket for Power Nozzle

Notice that the Electrolux® hose is tapered —smaller at the handle end, larger at the other end, to prevent clogging.

Depending on the type of cleaning you are going to do, you may attach your cleaning tool directly to the hose handle, or use one or two sections of the light-weight wands between the hose handle and the tool. The swivel-connector is always used with the larger cleaning tool.

Above you see your smaller cleaning tool. When the hinged sides are extended, it is an upholstery cleaner that cleans on flat or curved surfaces. Fold the sides back, reverse the tool and it becomes a dusting brush.

Your larger multi-purpose tool is reversible. Simply attach it to the swivel-connector, always being sure that plate marked "This Side Up" is visible when the cleaner is in use. Use the smooth side of the tool for rugs, and the brush side for floors, walls and ceilings.

## THE REVOLUTIONARY NEW POWER NOZZLE

This new and remarkable attachment is available with your Electrolux Cleaner. The Power Nozzle has a rapidly spinning, **motor-driven** brush that quickly cleans your carpets and at the same time gently fluffs the nap of the carpet to keep or restore

its luxurious look. Because the brush is driven by its own separate electric motor, you do not lose any of the powerful suction of your Electrolux Cleaner. A circuit breaker prevents overloading. Push button at rear to re-start.

## **How to be sure of always getting top cleaning power and efficiency from your Electrolux cleaner**

The answer is simple: always use only a genuine Electrolux® automatic self-sealing disposable filter bag. This is the bag that automatically seals in the dirt and dust your Electrolux Cleaner picks up—so that you never touch it, breathe it or see it! On the following two pages you'll see how the exclusive Electrolux filter bag operates to give you longer cleaning power and efficiency.

### **How to remove and insert your Electrolux® dust bag.**

To remove the bag, stand the cleaner on end, open the front cover by pressing the button at the top and take out the used filter bag.

It is time to change bags either when the bag is full or when the dirt inside reduces the suction. Fine powdery dirt will reduce the suction sooner than loose liny dirt.

Throw the used bag away—never try to use it over again. The bag is automatically sealed with the dirt inside.

Insert the new genuine Electrolux disposable filter bag. Close the front cover, and your cleaner is again ready for use. Your cleaner will operate only when there's a bag inside.

*this is why  
the  
**ELECTROLUX®**  
automatic  
self-sealing  
filter bag  
keeps on  
trapping dirt  
long after  
other  
bags fail*

This is the filter bag that traps all the dirt your Electrolux Cleaner picks up. There's no other bag like it. Why? Looking at it from the outside, you can see part of the reason. You can see that when the cleaner opens the Electrolux 'bag seals itself, locks in all the dirt. But that's not all . . .

It's the inside of the bag that counts! An ordinary vacuum cleaner bag consists of just a single thickness of paper or cloth. But if you tore open an Electrolux filter bag, you'd see inside three layers of filter liner, each with millions of tiny filters that trap dirt and let air through.

ordinary bag

Take an ordinary dirt bag, cloth or paper. There's only one surface to trap the dirt. As the cleaner picks up dirt, the pores of this ordinary bag clog quickly. Suction goes down quickly. You waste time and effort trying to clean with a dust-clogged bag that chokes off the cleaning power.

Electrolux bag

Now look what happens inside the Electrolux filter bag: the layers of filter paper trap the dirt while air keeps on flowing through the bag... the suction keeps on picking up more dirt. When ordinary bags clog up, you can be sure that the Electrolux bag is still working for you.

## ***use only genuine Electrolux<sup>®</sup> filter bags***

*They guarantee best  
performance in your  
Electrolux Cleaner. When  
you need more,  
use the handy re-order  
envelope packed  
with the bags or tear off  
the order form  
inside of the back cover.  
Mail it with your  
check or money order to  
one of the regional  
offices listed at the top of  
the order form.*

# now we're ready to put your cleaner to work for you!

Now that we've looked over your cleaner, your attachments and your filter bags, we're ready to let your cleaner do the jobs it was meant for. Here are the easy, step-by-step ways to put your Electrolux Cleaner and its attachments together, so that the powerful cleaning action can go to work!

**1** Slip the larger end of the hose into the suction end of the cleaner until it clicks. To remove, press buttons on side and pull out.

**5** Pushing the swivel connector onto the wand as far as it will go, locks it into place. Pressure on the spring clip unlocks it.

**2** The two sections of your wand fit together. For all cleaning at floor level, insert one section into the other, twist lightly.

**6** Your smaller cleaning tool is slipped into place with a twist, either on the hose handle or the wand, whichever is more convenient.

**3** Slip the hose handle into one end of the wand. Now you're ready to attach the tool to the other end of the wand.

**7** By reversing it, it converts from a dusting brush to an upholstery or fabric cleaner. Adjustable wings add to its versatility.

**4** To use the larger cleaning tool, first attach the swivel-connector to the tool. In use, be sure the plate marked "THIS SIDE UP" is visible.

**8** The Automatic Cord Winder has window-shade action. Just pull the cord out and plug it into a convenient electric outlet.

### **How to attach the power nozzle.**

Connect the hose to the suction end of the cleaner. Attach the other end to the wand of the Electrolux® Power Nozzle.

The connecting cord for the Power Nozzle is on the hose. Plug cord from Power Nozzle into receptacle at bent end of hose.

Plug hose cord into cleaner receptacle. When you turn on cleaner, Power Nozzle starts. Close flap when receptacle is not in use.

# *look how easy it is to clean your rugs and carpets!*

## *with the larger multi-purpose tool*

Just put hose in suction end, wand on hose, and the larger multi-purpose tool on the end of the wand, as shown on page 12. Use the tool with the bristles up, smooth rug-cleaning surface down on the carpet. Let the Electrolux Cleaner do the work. Simply guide the tool back and forth in free and easy strokes until every area has been covered.

If threads or other surface litter are tangled in the nap, a tip of the lever at one end of the tool brings the Gleaner® air-flow concentrator into action. Even dog hairs can be picked up easily. **Caution: be sure Gleaner is in OFF position when cleaning looped pile rugs, hooked rugs or rag rugs.**

## *...or with the new Power Nozzle*

Attach the Power Nozzle as described on page 13—then let the swift but gentle motor-driven brush action clean and beautify your carpet! The rotating brush helps make the powerful Electrolux suction even more effective. It fluffs the nap. If an obstacle jams the Power Nozzle, turn cleaner off and remove the obstruction. Press the Reset Button of the Safety Switch on nozzle before starting cleaner.

Your Power Nozzle slips easily under low furniture to take care of even those hard-to-reach places. Use it as often as you wish—it "gentles" fine carpeting. The Power Nozzle is available as an optional attachment to your Electrolux Cleaner.

# *important cleaning "How-to's" for all around your home*

**How to clean FLOORS** without spreading dust. Put hose in suction end, wand on hose, and larger multi-purpose tool on wand. Use tool with bristles down. Your cleaner will pick up all the scratchy dust and grit...keep your polished floors gleaming longer.

Lower wand with a slight twist to clean beneath furniture.

**How to take the drudgery out of cleaning STAIRWAYS.** Put hose in suction end, use only one section of wand. Use larger tool with bristles up for carpeted stairways, bristles down for uncarpeted stairs.

Use brush end of smaller tool for banisters.

Move your cleaner right up the stairs with you...cleaning a step or two at a time.

**How to clean WALLS** to save redecorating bills. Attach large multi-purpose tool same way as for floors...brush walls with bristle side. Dust clings to walls and ceilings, too. But regular cleaning keeps them fresh-looking, saves on repainting and redecorating bills.

If lint clings to brush, whisk it clean with suction from the open hose end.

**How to get the deep-down dirt out of your UPHOLSTERED FURNITURE.** Attach hose to suction end, insert hose handle through the brush of the smaller multi-purpose tool. Now extend the hinged sides of the tool. Your cleaner will remove the deep dirt as well as surface dust.

Note that the hinged sides of the tool make it a contour cleaner that will clean round and square edges as well as flat surfaces.

**How to clean filmy CURTAINS...DRAPEs.** Use the smaller multi-purpose tool, as shown...or reverse the tool and use the dusting brush.

To tame the powerful suction so that it doesn't "suck in" filmy fabrics, twist the Vacuum Adjuster until the suction is gentle enough.

**How to keep BEDDING** fresh and airy. Use the smaller multi-purpose tool in the same way as for cleaning upholstered furniture.

Frequent cleaning airs and freshens mattresses, pillows and blankets...removes fine dust seeping from pillows or mattress fillers.

To clean exposed bed-springs, reverse the tool and use the brush.

**ELECTROLUX 3 Brush B-8**  
*Floor Polisher and*  
*Carpet Beautifier*

- Brings back Floor and Carpet Beauty
- Banishes Floor Care Drudgery forever
- As a Floor Polisher it cleans and polishes every type floor to gleaming lustre in minutes
- Fingertip control
- Floating brushes adjust to flooring
- Easy to carry — Fold down handle
- Wax Mist Sprayer for easy application of wax
- Its Carpet Beautifier attachment for shampooing restores natural rug beauty — keeps carpets brighter, cleaner longer — quick foaming suds — quickly covers large areas — quick drying — professional quality cleaning
- Double insulated to conform to the requirements of Underwriters Laboratories, Inc.

*The Air-Powered Single Brush  
Rug Washer is an economical  
work-saving attachment to  
your ELECTROLUX Cleaner  
with it you may...*

- shampoo your rugs and carpeting without getting down on hands and knees
- no rinsing or wiping up required
- dispenses the right amount of shampoo
- restores carpet beauty without soaking
- quick, easy, saves rug cleaning bills
- Does an excellent job in just a little more time.

## ***The Electrolux® Vaporizer***

for effective, economical moth protection  
attaches to blower end of your Electrolux  
Cleaner

vaporizes moth crystals to form a gas  
that is deadly to moths when the gas is  
confined as in a closet.

## ***The Electrolux® Sprayer***

sprays insecticide,  
garden spray,  
moth-proofing liquids

may be used to spray  
paint if paint is thinned

a dial on top controls  
the amount of spray

Crevice Tool...  
puts your Electrolux  
Cleaner's suction  
to work in  
radiators, other  
hard-to-reach places.

White Dusting  
Brush  
...for delicate  
lampshades or  
other furnishings  
that need  
special care.

White Wall Brush...ideal for cleaning  
all kinds of walls and ceilings, painted  
or papered.
