

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

DENDROBIUM CAPILLIPES

Origin: Asia

Temperatures: Hot to cool growing small orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing in active growing season, no fertilizing from October, no watering when completely leafless and dormant.

General care: Very cute Dendrobium species with beautiful yellow blooms. Grows best under hot to cold conditions, in bright light, good humidity and air movement. Can be grown potted or mounted. Goes deciduous for the wintertime – no fertilizing from October, no watering when completely leafless and dormant (only light misting every 7-10 days) till new growths appear in the spring time. Great plant for terrariums, vivariums, windowsills, greenhouses and outdoors in proper zones.
