

SPATHOGLOTTIS PUBESCENS

Origin: Asia

Temperatures: Hot to cold growing small size terrestrial orchid species

Light: Bright light

Watering & Fertilizing: Regular watering and fertilizing in active growing season, deciduous in the winter time.

General care: Beautiful small to medium size terrestrial orchid species is not commonly seen in cultivation. Grows best under hot to cold conditions, in bright filtered light or filtered LED light and good humidity with air movement. They do go through cycle – active growing season starts in spring and continues through summer. They go dormant in fall. You should keep regular watering and fertilizing in active growing season, and withal watering and fertilizing in fall/winter when bulb is dormant. Can be grown potted. Great plant for indoor growing on windowsills or greenhouses and outdoors in proper zones.
