

TRICHOSALPINX PERGRATA

Origin: Central & South America

Temperatures: Warm to cold growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round

General care: Miniature orchid species with beautiful large blooms compare to size of the plant, compact growing Trichosalpinx species. Grow best under warm to cool conditions, in shade with high humidity. Great plants for any terrariums / vivariums, frog encounters and glass orbs, greenhouse growing and outside in proper zones.
