

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

TAENIOPHYLLUM HASSELTII

Origin: Java

Temperatures: Warm to hot growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round

General care: This miniature leafless orchid species is great addition to any collection. Not commonly seen in cultivation, spikes can appear at any time of the year and are sequential bloomers – will re-bloom for many weeks. Grows well under hot to warm conditions, with high humidity and bright shade, best when mounted. Good air movement. Great for outdoor / indoor growing, windowsills or greenhouses, perfect for terrariums / vivariums and frog encounters. Can be grown in Florida outside year-round.
