

## OBERONIA CAVALERIEI

**Origin:** Asia

**Temperatures:** Warm to cold growing small orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing year-round.

**General care:** Awesome small orchid species with stunning spikes covered with dozens and hundreds of tiny orchid blooms. Oberonia cavaleriei was wrongly misapplied as Oberonia myousrus in the past. They like shade, grow excellent under warm conditions, great for outside Florida growing or any windowsills, terrarium, vivarium and greenhouse. Can be grown potted or mounted. They like to dry out between waterings and hate over water.
