MICRO, MINIATURE AND SMALL ORCHIDS

## DENDROBIUM JENKINSII

**Origin:** Asia

**Temperatures:** Hot to cold growing small size orchid species

**Light:** Bright light

**Watering & Fertilizing:** Regular watering and fertilizing in active growing season, semi-deciduous, no fertilizing and reduced watering in the wintertime.

**General care:** Cute yellow blooms on this small Dendrobium species that is easy to grow. Blooms occur in spring after winter rest. Grows best under hot to cold conditions, in bright light or filtered LED light (during winter dormancy direct sun is preferable), good humidity and air movement. Can be grown potted or mounted. Goes semi-deciduous – either reduce or no fertilizing from October, little watering during the wintertime just to prevent canes from shriveling, till new growths appear in spring. Great plant for terrariums, vivariums, greenhouses and outdoors in proper zones.
