

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

CHILOSCHISTA VIRIDIFLAVA

© Marni Turkel

Origin: Thailand

Temperatures: Hot to cold growing small orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing spring to fall, slightly less in the winter time, high humidity.

General care: Leafless orchids are fun to grow and always sought-after from all orchid growers. Chiloschista orchid species belong among easy to grow ones with beautiful blooms covering their long spikes with dozens of buds in different colors. Grows best mounted (not suitable for potting otherwise empty wooden basket would be used), hot to warm, bright shade to filtered bright light. They like good watering and fertilizing in active growing season, adding some seaweed will benefit roots, covering with life Spanish moss will help keep higher humidity. Great for greenhouses, terrariums, vivariums, windowsills and outside year-round.
