

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

AERANGIS KIRKII

Origin: Africa

Temperatures: Hot to warm growing small orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, let slightly dry between watering

General care: Another beautiful African orchid species with star – shaped off white blooms. These are easy to grow plants and do best when mounted hanging down, grown in bright shade, letting slightly dry out between each watering. Potting in wood / plastic baskets is possible as well. Great plants for windowsills, greenhouses or outside in Florida year-round.
