MICRO, MINIATURE AND SMALL ORCHIDS

## ANGRAECUM PSEUDOFILICORNU

**Origin:** Madagascar

**Temperatures:** Warm to intermediate growing small size orchid species

**Light:** Bright shade

**Watering & fertilizing:** Regular watering and fertilizing year-round letting slightly dry out between waterings

**General care:** Super attractive and hard to find Angraecum species. These are similar to *A. scottianum*, but smaller in growing habit. Grows best in bright shade or shade, letting dry between waterings, hot to warm temperatures. Can be grown potted or mounted. These are great for any Florida outside growing, windowsill growing, terrariums and vivariums, greenhouses.
