MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM MONILIFORME

Origin: Asia

Temperatures: Intermediate to hot growing micro - miniature orchid species

Light: Deep shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity.

General care: One of the smallest Bulbophyllum species with attractive green pearl-like pseudobulbs that occasionally produce tiny deciduous leaf. Stunning “huge” blooms in compare to plant size occur between fall and spring. Grows best mounted, high humidity, intermediate to hot temperatures and deep shade. Great for greenhouses, terrariums, vivariums, vases, frog encounters and in Florida outside year-round.
