MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM OBTUSUM

Origin: Asia

Temperatures: Hot to cool growing small size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round.

General care: This Bulbophyllum described as miniature is for sure not miniature in plants size – small plant is quite clumsy and grows on long rhizomes with stunning clusters of orange blooms. Grows best under hot to cool conditions, in bright shade, high humidity. Can be grown potted or mounted, best when potted in baskets allowing hanging down. Great plant for terrariums, vivariums, indoor growing on windowsills or greenhouses and outdoors in proper zones like Florida.
