MICRO, MINIATURE AND SMALL ORCHIDS

## BULBOPHYLLUM AYUTHAYENSE

**Origin:** Thailand & Laos

**Temperatures:** Intermediate to hot growing miniature size orchid species

**Light:** Bright shade

**Watering & Fertilizing:** Regular watering and fertilizing in active growing season, high humidity, keep dry when completely dormant and no fertilizing from fall till new growths appear.

**General care:** Miniature Bulbophyllum species with attractive pseudobulbs and stunning large blooms. Grows best under hot to intermediate conditions, in bright shade, constant high humidity, regular watering and fertilizing in active growing season, completely dormant for the winter time - stop fertilizing end of October, and do not water when all leaves are gone - light misting to keep pseudobulbs from shrinking, till new growths appear late spring or early summer. Great for greenhouses, windowsills, terrariums / vivariums or outdoors year - round in proper zones.
