MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM COMBERI

Origin: Asia

Temperatures: Hot to cold growing creeping miniature size orchid species

Light: Shade

Watering & Fertilizing: Regular watering and fertilizing year-round

General care: This one is great creeping miniature Bulbophyllum species that blooms many times a year, very easy to grow. Not commonly seen in cultivation, this plant produces dozens of very colorful and nicely shaped blooms at the base of pseudobulbs. Grows best under hot to cool conditions, in shade, high humidity. Can be grown potted or mounted. Great plant for terrariums, vivariums, glass orbs, vases, frog encounters, indoor growing on windowsills or greenhouses and outdoors.
