

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM MIRUM

Origin: Asia

Temperatures: Warm to cold growing small size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity.

General care: Nice and very easy to grow small Bulbophyllum species. Although it is described as cool to intermediate growing, we do grow our plants outside in Florida for several years and they love it! Grows best under warm to cool conditions, in bright shade, with high humidity, do not let bone dry. Can be grown potted or mounted. Excellent plant for terrariums, vivariums, frog encounters, windowsills, greenhouse growing and outside year-round in proper zones.
