

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

BULBOPHYLLUM PHYSOMETRUM

Origin: Thailand

Temperatures: Cool to hot growing miniature size orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity.

General care: Fairly new in cultivation miniature Bulbophyllum species with creeping growing habit forming new pseudobulbs on the new long rhizomes spreads over the mount quickly. This one produces quite unusual looking blooms. Grows best under hot to cool temperatures, in bright shade, with constant high humidity. Due to creeping growing habit it is better to be grown mounted. Great for any terrariums / vivariums, frog encounters and glass orbs, windowsills or grown outside in Florida year-round.
