

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

COMPARETTIA SPECIOSA

Origin: South America

Temperatures: Warm to cold growing small size orchid species

Light: Bright shade

Watering & fertilizing: Regular watering and fertilizing year-round.

General care: This one is truly stunning, and common name is 'THE BEAUTIFUL COMPARETTIA'. It describes this small orchid gem completely – easy to grow species with breathtaking blooms! We do grow them like our Oncidiums, hot to warm temperatures (but can take cool temperatures as well), shade or bright shade, good air movement, letting dry between waterings. Can be grown potted or mounted. Great plants for windowsills, greenhouse growing and outside year-round in proper zones.
